## 1. INTRODUCTION:

### 1.1. Purpose:

The purpose of this document is to give a detailed description of the requirements for the ***“Meet at bar”*** a social networking app for the Bar Lovers. It will illustrate the purpose and complete declaration for the development of system from scratch. It will also explain system constraints, interface and interactions with other external applications. This document is primarily intended to be proposed to a client for its approval and a reference for developing the first version of the system for the development team.

### 1.2. How Meet At Bar Differ?

If we compare another dating apps in the market with Meet at bar, there are a great deal of contrast. In Meet at bar, our concentration is not exclusively to coordinate the two profiles to date. We help the Bar Hoppers who're at bar currently can communicate with everyone unlike dating app where both should have matched or like each other. Another element to make it vary from other application: We're providing a way to make your privacy as a priority where user can customize their privacy as per need which bring us in a market with out of the box concept where bar hopper make the information private and set who can see.

Meet at bars is an app to serve as a guide to bars, events and people. Its goal is to make going out at night to bars or events more efficient and convenient. It also allows the user to see who is out and about at night. Each bar hopper will have a profile page that will show basic information. If another user shows interest, a drink invite can be sent. This part of the app allows users to meet in an actual bar or event. There is no matching algorithm in the app but there is a filtration functionality that will allow people to find specific people.

### 1.3. Scope of the Project:

**Objective:** The aim is to provide the facility by developing a **mobile application (iOS)** for the Bar/Club lovers who generally search the nearby Bars over the weekdays/weekend or try to find out the best Bar within their geo-fencing but couldn't find which Bar could be best within their area. This application **Meet at bar** will help the Bar Lovers, generally called Bar Hoppers to find out the nearby Bars and let their friends know if Bar Hopper checked-in in any Bar.

The another feature of the **Meet at Bar** application allow the user to interact with the other Bar hoppers and help the users to become friends who have checked-in in the same Bar. Apart from communicating by using the app, user can access the Newsfeed section where Bar Hopper can share the photos/videos and other bar hopper can like/comment to show their interest.

- Bar hoppers create a profile that shows information like height, built, marital status, do you have children, profession, etc.
- In addition there is a personal questionnaire section (example: do you want to get married? Do you want children? Do you kiss on the first date, etc?) That the bar hoppers answer.
- The bar hopper can choose to make this information private or public.

- If bar hopper decides to make it private, a request to view private information needs to be requested for approval to view.
- The recipient will know see the request and know who is requesting to view the personal information. The recipient can check the profile of the person requesting it and decide to approve or disapprove. Once the request is approved, the person who requested it will get a push notification as well as a message in the app that his request has been approved.
- A key feature of the app is that users will automatically be checked in to the bars and automatically checked out when the users move to another bar.
- For instance, when the user walks to a bar, based on the longitude and latitude of the bar, the app will check in the user at that particular bar when they approach close to 200 ft from the longitude and latitude.
- The same thing will happen when the user leaves the bar, the app will un-check in the user from that bar.
- There will be instances that app will detect that the user is in proximity to more than one bar so the app will recognize this and a pop up will confirm the location of the user.
- An option is also provided for the user to manually check in to a bar.
- However, the ability to manually check in will need to be confirmed by the GPS location of the user so that a user can only check in to bars that are proximal to their GPS.

Another objective of Meet at Bar is to provide the facility to the Bar Owners to show the online presence of Bar through **web dashboard** which will help the Bar Hoppers to find-out and compare the Bars within nearby. Bar Owner will have a feature to list the Events/Promotions and track who will be attending the Event.

- The bar landing page in the app is the page with all the bars are listed.
- This list of bars is derived from two sources.
- One source is possibly Google places to get the names of bars the is proximal to the users.
- The app will get information from the Google Places API with regards to address, phone no., pictures of the bar, hours of operations and type of bar.
- Two, a bar that is not listed in Google place can create a bar owner account and enter their own information with regards to the address, tel. No, hours of operations, type of bar.
- Please note that bars that are listed in Google Places will need to be registered by the owners from the web.
- A bar owner who finds their bar already listed in the app through Google places will still need to create a bar owner account. The registration of the bar owner will allow the bar owner to access the dashboard, tracking of customers by GPS, create free promotions and etc., that will target the bar hopper members of our app.
- Aside from the bar owner, promoters and event organizers can also create a similar account as the bar owner. The promoters and event organizers will be able to create promotions that will be published on the promotions page. The promoter and event organizer account will allow them to have a dashboard to also track the traffic to their promotion or event.

Super admin is an integral part of the app the will allow full control and modification, update of the app. The superadmin will allow modification of terms of use and privacy policy, change subscription terms and prices, and more.

Flexsin: We would like to mention that we have designed the Super Admin dashboard as per the front-end application. Please review the Admin dashboard and if still you want to add something whether in the report section or in other section then please let us know.

Regarding the Terms of Use, Privacy Policy and Subscription plan will be managed from the backend.

However, please let us know what you're considering in "MORE" as we need to freeze the things in the SRS document itself.

#### 1.4. Monetization of the App

By the way, Meet at bar application will be free to use. However, if a user wants to gain access of all the features without having the limitation per day or numbers then we have a defined plan for the users to purchase and access the features. From this Meet at Bar Plan, we're getting the money from this application.

- We're getting money to provide the dashboard to the Bar Owners | Event Organizers | Promoter | Advertiser to manage the respective roles i.e. Create Event | Promotion | Ads | and access dashboard.

The bar owners will have a free use the dashboard and ability to advertise on the promotions page for free. Let us define the free advertising parameters for the bar owner and how we will monetize the bar owners

Flexsin: We have created a document to define the plan for Bar Owner and other users. Please download the document from the below mentioned link:

[http://www.flexsin.org/sharedoc/tmp/1496292695\\_Subscription\\_Plan\\_For%20Users.xlsx](http://www.flexsin.org/sharedoc/tmp/1496292695_Subscription_Plan_For%20Users.xlsx)

We can define the features for free in an excel sheet.

- After the user has browsed 100 bar hopper profiles:

Client: Free users will be able to send 5 limited gifts per 12 hrs and unlimited messages . However, free users can not check who sent the messages or the gifts and what is the message unless they sign up for a paid membership.

If the user browses more than 100 user profiles and had to wait 12 hrs to view another 100, After the second time the user browses another 100 profiles, the user will have to wait 24 hr. The wait will be 24 hrs for browsing 100 profiles

Flexsin: Yes, we do understand

- User will not be able to view anymore until he waits for 12 hours.
- To remove the limitation the user will have to pay for a basic plan.

If the VIP does not include a video, we need to indicate that the member is a VIP in place of the video

Flexsin: Okay, we will do so

We will offer a VIP plan that has the following privileges:

- Ability to not include a profile video
- Able to enter bar chats without being at the location
- Advance filter

Please define the advance filter

VIP will have an advanced filter to special relationships but the rest of the advanced filter is for paid subscribers

Flexsin: Okay, we do understand

Flexsin: Advance Filter By:

- Select Purpose
- Special Relationship – Only for VIP Members
- Select Marital Status
- Select Height
- Select Body Type
- Drink Alcohol – Yes | No (Slide Yes or No button)
- Education Level

### 1.5. Features of Meet at Bar Application

There are some features of the mobile application:

- Upload Your Introduction Video
- Add Your Answers of Defined Questions
- Invite for a Drink to Anyone
- Search nearby Bars
- Search Events | Promotions
- SPY Question for Bars
- See how many users checked-In
- Browse Users based on Filters
- Newsfeed
- Communicate within Group | One-by-One
- Send and receive gifts from other users
- Favorite bars and other users
- Go to bars and chat with members at bars
- Auto check in to bars
- members can post videos and pic on news based on location
- Search special relationships and basic profile info of other users
- Users are notified when someone checks their personal profile, invite for a drink, receipt of a gift
- Users are displayed based on their popularity which is determined by how many favorites, invites for drinks and number of gifts received
- Ad mobs on mobile app
- Banner ads and full page pop ups for ads on free users
- no ads on subscribers and VIP. Ads can be shown on the news feed for paid subscribers

### 1.6. Features of Meet at Bar Web Dashboard

- Update\ Bar Profile | Features | Photos
- Set Permissions for Sub-Users

The superadmin should be able to create and postpaid ads in the mobile app and bar owner dashboard for example Budweiser beer can pay for ads to be displayed in the mobile app or bar admin page.

**Flexsin:** Okay, we do understand that super admin can be able to create and postpaid ads but we don't have enough space on the bar owner dashboard to display the ads, so please let us know where can we display the ads. Also please confirm the payment for these ads (posted by admin) will be done manually.

Can we have a banner space in the dash board or an actual page pops up?

**Flexsin:** NO, we haven't discussed thing.

- Create Events | Promotions
- Create Advertisements
- Send SPY Questions to Bar Hoppers
- Get Feedback from Bar Hoppers

The bar owners, event organizers, promoters should be able to post on the news feed as well.

**Flexsin:** This we haven't discussed before and we haven't included this section on bar owner dashboard as well.

Newsfeed is a place where the bar owners , promoters, and event organizers can advertise for paid advertising

**Flexsin:** Okay

- View Demographic Report

NOTE: Dashboard will be access by the following type of users:

- Bar Owners
- Event Organizers
- Promoters
- Advertisers

NOTE: We will develop the admin backend as well for the Client.

Unlike a bar owner with one location, Event organizers and promoters can create promotions that may be in different locations. Please explain how the dashboard will wok based on different promotion location.

**Flexsin:** For this, they will have to select the location

**There would be basically one type of user for the mobile application:**

Other users of the mobile app may include representatives of bars or promoters or event organizers who may try to promote their business through the mobile app

**Flexsin:** But this will be considered as Bar hopper not another entity

1. **Bar Hopper-** This application allow the bar hoppers to create profile and browse the other bar hopper to communicate within the app. Bar Hoppers will be able to search the nearby Bars/Events/Promotions and see the no. of members who has checked-in within the app. There will be many features which are paid and user would have to purchase the plan to access the features. Bar Hoppers will be able to view the list of the profiles based on the available parameters in the app and view the profile of the user in the app.

**Another type of users for the website:**

2. **Bar Owners:** Bar Owners will register on the website by updating their Bar information fetched from Google Places API or add own details. After successful verification, bar owners will be able to access the dashboard to manage the bar information, manage events/promotions, manage sub-admin, reports, SPY questions. Ads, etc. from the dashboard.
3. **Event Organizer/Promoter:** Any individual Event Organizer/Promoter will also be able to sign-up onto the website to access the dashboard which allows both type of actor to manage the Events/Promotions and view the reports for the Events/Promotions. **This user may include a band group promoting themselves.**

A musician band can create an account so that they can create a promotion on the promotion page.

Flexsin: This will be considered as a promoter not as an individual category.

4. **Advertiser:** There will be another type of actor who will post the ads from the dashboard which will be displayed on the app.

Advertiser will pay for the ads. Admob from google will be integrated in the app

Flexsin: Yes advertisers will be able to make payment for the ads they'll be posting. Yes we are integrating Admob in the app.

**Please design a way to promote paid advertisements in the mobile app i.e. Insert it in some of the pages in the mobile app**

**Flexsin: okay. We will display only full page advertisements.**

5. **Admin- Administrator/Admin** user will have full control over the application. She/he shall manage users, notifications; manage payment, email triggers and content management system, etc.

**NOTE:** We have defined the admin section in detailed in this document.

## 1.7. Platform for Mobile Application

### Native Application:

- iOS
- Using Objective C (Existing Language)

### Device:

- For iOS-iPhone Only

### OS Version:

- For iOS- iOS 10.0

## 1.8. Browser Compatibility:

Browser	Version
Internet Explorer	Internet explorer 10.0 and above
Mozilla Firefox	Mozilla 36.0 and above
Safari	Safari 8 and above
Chrome	Chrome 46 and above

## 1.9. Technology:

The system shall be developed using following technologies to develop **Website:-**

<b>Servers:</b>	Apache
<b>Server Side Scripting:</b>	PHP
<b>Framework:</b>	Yii Framework (Existing Framework)
<b>Database:</b>	My SQL
<b>Client Front-end:</b>	HTML5
<b>Client Side Scripting:</b>	JavaScript
<b>Servers:</b>	AJAX

**NOTE:** Only Web Dashboard would be responsive up to mobile phone. We will develop the non-responsive admin's backend.

### 1.10. Server Requirement:

For initial stage go with AWS free tier & after application/website gets LIVE having good traffic then we can move on the higher configuration of server

- Server Configuration :
- Cores = 1Cores
- Storage = 20 GB
- RAM = 1 GB
- Dedicated IP = 1
- Support = managed

**Note: -**

**Bandwidth needed = Average Page Views x Average Page Size x Average Daily Visitors x Number of days in a month (30) x Redundant Factor**

- Average Daily Visitors: The total number of monthly visitors/30.
- Average Page Size: The average size of your web page.
- Average Page Views: The average page viewed per visitors.
- Redundant Factor: A safety factor ranged from 1.3 – 1.8.
- 

**Apple Push Notification service (APNs) requires open Ports:**

- TCP port 5223 to communicate with APNs.
- TCP port 2195 to send notifications to APNs.
- TCP port 2196 for the APNs feedback service.
- TCP port 443 is required during device activation, and afterwards for fallback (on Wi-Fi only) if devices can't reach APNs on port 5223.

### 1.11. Operating Environment

Platforms	Technology we'll use	Estimated for
-----------	----------------------	---------------

<p>iPhone Development</p> 	<ul style="list-style-type: none"> <li>• Xcode version 6.2</li> <li>• Minimum OS version supported: iOS 7 and iOS 8+ (Latest 10.2.1)</li> <li>• Device Support: iPhone 5, 5S, 5C, 6, 6+, 6S, 7, 7Plus</li> <li>• Objective Language</li> <li>• Core Data local database</li> <li>• Portrait Mode</li> <li>• Third party Libraries like JSON, ASIHTTP, Reachability, iRate, and more</li> </ul> <p><b>Note:</b> OS version support shall only be applicable on the available latest OS version at the date of signing the contract. All future OS versions during the execution/ completion of the project shall be treated as an Add-on and shall follow the Change Management Process.</p>	<p>iPhone</p> 
<p>Web Admin Development</p> 	<p>Web backend would be in Yii Framework</p>	<p>Non Responsive Web Admin:</p> 

#### 1.12. Targeted Regions & Languages:

Target	Remarks
Region	USA and Other Countries

Target	Remarks
Language	English

Please define more screens....

We will also have the subscription screen and payment gateway PayPal

Flexsin: We need to discuss for the subscription screen (we will discuss this in our next call) and regarding payment gateway PayPal it will be defined during the development phase.

### 1.13. Use Case Appendix:

Mobile App	
• Download App	UC_MAB_GN_00
• Splash Screen	UC_MAB_GN_01
• Login	UC_MAB_GN_02
• Forgot Password	UC_MAB_GN_03
• Sign Up	UC_MAB_GN_04
• Create New Password	UC_MAB_GN_05
• Create Your Profile	UC_MAB_GN_06
• Pop-up to Allow	UC_MAB_GN_07
• Home Screen	UC_MAB_GN_08
• Bars   Events & Promotions	UC_MAB_GN_09
• Bar Information Screen & Event   Promotion Screen	UC_MAB_GN_10
• Meet Screen	UC_MAB_GN_11
• User Profile Information	UC_MAB_GN_12
• News Section	UC_MAB_GN_13
• Chat Screen	UC_MAB_GN_14
• More Screen	UC_MAB_GN_15
Bar Owner Interface	
• Homepage	(UC_MAB_WD_01)
• Login	(UC_MAB_WD_02)
• Forgot Password	(UC_MAB_WD_03)
• Signup	(UC_MAB_WD_04)
• Register Bar	(UC_MAB_WD_05)
• Dashboard	(UC_MAB_WD_06)
• Bar Profile	(UC_MAB_WD_07)

• Sub-Users	(UC_MAB_WD_08)
• Events & Promotions	(UC_MAB_WD_09)
• SPY Questions & Feedback	(UC_MAB_WD_10)
• Membership Plans	(UC_MAB_WD_11)
• View Ratings	(UC_MAB_WD_12)
<b>Admin Dashboard</b>	
• Login	(UC_MAB_AD_01)
• Admin Dashboard	(UC_MAB_AD_02)
• Bar hopper Management	(UC_MAB_AD_03)
• Bar/ Bar Owner Management	(UC_MAB_AD_04)
• Event Organizers Management	(UC_MAB_AD_05)
• Promoters User Management	(UC_MAB_AD_06)
• Packages Management	(UC_MAB_AD_07)
• Manage Add-Ons	(UC_MAB_AD_08)
• Manage Subscriptions	(UC_MAB_AD_09)
• Manage Payment Log	(UC_MAB_AD_10)
• Manage Events   Promotions	(UC_MAB_AD_11)
• Manage Advertisements	(UC_MAB_AD_12)
• Manage Mass Mail	(UC_MAB_AD_13)
• Manage Sub-Admin	(UC_MAB_AD_14)
• CMS Management	(UC_MAB_AD_15)
• View Reports	(UC_MAB_AD_16)
• Logout	(UC_MAB_AD_17)
• Manage Post for Newsfeed	(UC_MAB_AD_18)
• Manage Gifts	(UC_MAB_AD_19)
• Manage Reports for Newsfeed   Users   Bars   Events   Promotions	(UC_MAB_AD_20)

## 2. USE CASE MODEL HIERARCHY:

### User Characteristics:

*Following Actors interact with the system as per the current scope of the system.*

**Bar Hopper** – This application allow the bar hoppers to create profile and browse the other bar hopper to communicate within the app. Bar Hoppers will be able to search the nearby Bars/Events/Promotions and see the no. of members who has checked-in within the app. There will be many features which are paid and user would have to purchase the plan to access the features. Bar Hoppers will be able to view the list of the profiles based on the available parameters in the app and view the profile of the user in the app.

The bar hoppers will be able to join bar chats, receive virtual gifts and send virtual gifts, send drink invites to each other and choose favorite bars and favorites A bar hoppers. Number of virtual gifts, favorites and drink invites will serve as popularity ranking for each bar user.

**Flexsin:** Yes, we have included the above said feature into the scope i.e. The bar hoppers will be able to join bar chats, receive virtual gifts and send virtual gifts, send drink invites to each other and choose favorite bars and favorites A bar hoppers.

Also there would be three parameters for deciding the popularity or ranking of the bars i.e. –

1. Number of Virtual Gifts
2. Number of favorites (mark as favorite by other users)
3. Number of Drink Invites

### 1. Users for Dashboard:

- ❖ **Bar Owners:** Bar Owners will register on the website by updating their Bar information fetched from Google Places API or add own details. After successful verification, bar owners will be able to access the dashboard to manage the bar information, manage events/promotions, manage sub-admin, reports, SPY questions. Ads, etc. from the dashboard.
- ❖ **Event Organizer/Promoter:** Any individual Event Organizer/Promoter will also be able to sign-up onto the website to access the dashboard which allows both type of actor to manage the Events/Promotions and view the reports for the Events/Promotions.
- ❖ **Advertiser:** There will be another type of actor who will post the ads from the dashboard which will be displayed on the app. Advertiser will pay for the ads.

We need to have a method for superadmin to upload these paid advertisements

**Flexsin:** yes, we have included this feature in the super admin's dashboard that they will be able to upload these paid advertisements from backend.

And we need to have a predetermined location of where the ads will show and how many times or for how long or what city and state.

**Flexsin:** okay. We will do so.

**Cesar:** Ads will be posted by selecting a particular category and the location i.e. city along with its placement where it will be displayed.

2. **Admin User-** Administrator/Admin user will have full control over the application. She/he shall be allowed to manage users, notifications, email triggers and content management system. Admin user will have full control over the website.

Flexsin

### 3. Use cases for Meet at bar iOS Mobile Application:

A use case is a written description of how users will perform tasks on your application. It outlines, from a user's point of view, a system's behavior as it responds to a request. Each use case is represented as a sequence of simple steps, beginning with a user's goal and ending when that goal is fulfilled.

#### Following key modules will be developed:

##### 3.1. Download App (UC\_MAB\_GN\_00)

Use Case Name:	Download App
Actor:	General Users
Purpose:	Users will be able to download the application from iTunes.
Description:	When user goes over the app store then the application can be searchable using the keyword: Meet At Bar or MAB.
Normal Flow:	<p>Application will only be available over Apple App Store and user would have to download the application for free.</p> <p><b>Download Meet At Bar from App Store/iTunes</b></p>  <p><b>NOTE: Application will be free to download. However, user will be able to access the paid feature by using the in-app purchase feature.</b></p>
Alternate Flow:	User will also get the link to download the application from the website. Once a user clicks on Download Application then user will re-direct to the iTunes store to download the application.
Screenshot:	<p><b>Meetville – Meet Singles, Chat &amp; Date to Find Love</b> By Meetville</p> <p>Open iTunes to buy and download apps.</p>  <p><b>Description</b></p> <p>Get a date real quick. Thousands of amazing women and decent men are</p> <p>Join now to find love, new friends and build long-term relationships.</p> <ul style="list-style-type: none"> <li>• Meet thousands of singles in your city or while travelling.</li> <li>• Invest your time in getting to know someone who is also seeking the same.</li> <li>• Discover your perfect match and don't let true love pass by!</li> </ul> <p><b>FEATURES</b></p> <ul style="list-style-type: none"> <li>– Endless choice of potential partners.</li> <li>– Smart matching based on common interests, values and psychological compatibility.</li> <li>– Finding a soul mate made easy with big photos and detailed profiles.</li> </ul>

Comments:	<p>For iOS: Client would have to enroll for the developer account and the cost for the developer account would be bear by Client.</p> <p>NOTE: <a href="https://developer.apple.com/programs/enroll/">https://developer.apple.com/programs/enroll/</a></p> <p>To deploy the application over app store, Client would have to provide some information which we require to submit the application.</p> <p>Our development team will send the questionnaire form when we're ready to deploy.</p> <p>Apart from this, our development team will send the questionnaire form while we're ready to deploy the app over iOS as we need to fill the form while submitting the application.</p>
-----------	---

### 3.2. Splash Screen (UC\_MAB\_GN\_01):

Use Case Name:	Splash Screen
Actor:	General Users
Purpose:	<p>While loading the application when a user clicks on the icon to open, Splash screen will be displayed and application will load the content within the set period of time.</p> <p>Once a Registered or non-registered user clicks on the app icon to launch the application.</p>
Description:	<p>A splash screen is a graphical control element consisting of window containing an image, a logo and the current version of the software. A splash screen usually appears while a program is launching. Splash screens are typically used by particularly large applications to notify the user that the program is in the process of loading. Occasionally, a progress bar within the splash screen indicates the loading progress. A splash screen disappears when the application's main window appears.</p>
Normal Flow:	<p><b><u>There will be no Animation on the Splash Screen logo.</u></b></p> 

The Splash Screen will be the landing Screen of the application. It will have the logo of the app and app name. Splash screen will display for 3-5 seconds. Splash Screen will contain name along with logo of the app.

S.No	Requirement	Comments
1.	When a user clicks on icon of Meet At Bar then application will be launched and app will display the Splash screen at the very first.	Icon will be created by Flexsin as well.
2.	Splash Screen will be displayed for 3-5 seconds.	We can increase/decrease the duration at the development level.
3.	Splash Screen will contain the logo along with the name of the app.	Flexsin has created the Logo for Meet At Bar and Client has approved it.
4.	There will not be any animation on Logo.	
5.	Once the splash screen will disappear, user will land on Home Screen of the app (For Existing User).	There is a remember password feature and when user clicks on splash screen, user will direct to the Bar Listing Page.  For Existing User: Default screen after splash screen will be Bars. Or If a user purpose would be friendship or meet friends, then user will direct to the Meet screen.
6.	There are the following purpose: Select Looking for Nearby Bar, then user will direct to Bar Listing page. Select Looking for Event/Promotions, user will direct to Event/Promotion Page Select Looking for Friends, direct to Meet Screen. NOTE: Users will be able to select multiple purposes as well.	There are other purposes as well:  Find nearby bars Find nearby events Meet up with old friends Meet new friends Find a committed relationship Find a casual/fun relationship Find a supportive relationship

		For multiple purpose, user will direct to any of the page as it will not be decided where we should re-direct.	
	7.	For the new user, user will be landing on Screen where they can select an option to login/sign-up into the app.	
	8.	User will be able to close the application as well.	
Alternate Flow:	Splash Screen would be very first screen of the application and splash screen will be displayed to the user when a user wants to open the application by clicking on an icon.

### 3.3. Login (UC\_MAB\_GN\_02):

Use Case Name:	Login
Actor:	General Users
Purpose:	This screen will allow the user to access the application.
Description:	This is the page after the splash screen when a user launches the application. User must have to login to the application first in order to access the application. If a user is not registered, he needs to register his profile to enjoy the services of this application.

Normal Flow: After Splash screen, users will be able to view the login screen to enter the login credentials and if a user wants to create a new account, then he would have to click on the signup link to submit the details.

S.No.	Requirement	Comments
1.	<b>Username*</b> - System shall require user to enter the user name.  Username should be unique to every user.	User name should match from the database to validate. Users will be able to enter the email address as well if a user doesn't want to enter their username.
2.	<b>Email Address*</b> - System shall require user to enter the email address instead of user name.	Email Address must be verified while signup to use the email address while login. Email Address should exist in the database to verify the login.
3.	<b>Password*</b> - System shall require the user to enter an alphanumeric password.	Password length could be 6 to 12, which must contain at least a number, a Capital Letter, a special character and normal character as well.
4.	<del>Keep me Logged-In- User shall choose the option to remember their login into the app.</del>  NOTE: Instead of providing the keep me loggedin, system will do auto login without asking for system to keep me loggedin. So, we're removing it from design.	Whenever an existing user opens the app then system allow the user to access the application instead of enter the login credentials again.
5.	<b>Forgot Password</b> - System shall allow the user to get the password again if a user forgot.	System shall allow the user to enter their email address or phone number to reset their password.
6.	<b>New User? Click Here</b> – If a user doesn't have the login credentials <b>then there is an option to sign-up as a new user</b>	New Screen will be displayed when a user wants to sign-up as a new user.
7.	<b>Login button</b> - System shall	If login details doesn't

		match the username/email address, password, entered by user in the DB before allowing or restricting user access.	match user will be asked to re-enter the login details
Alternate Flow:	<p>Users will have an option to login with Facebook.</p> <p><b>For Facebook login</b>, we will integrate the Facebook API and the information will be fetched from Facebook.</p> <p>When a user clicks on Sign-in with Facebook then a browser will be opened within the app to login into the Facebook and authorize the user to login into MAB.</p> <p>After Login using Facebook, user will direct to a screen to enter the answer of basic questions i.e. Second Step of Registration and other basic questions as well.</p>		
Post Condition:	<p><b>PC 1:</b> User can either continue to access the features of the system or Logout.</p> <p><b>PC 2: Logout</b> will be visible on More option post login.</p> <p><b>PC 3:</b> If the entered credentials are found invalid, then application will prompt a message "Invalid username or password".</p> <p><b>PC 4:</b> If the user doesn't enter any of the required credential (username/email address or password) then application will prompt a message "<b>Please enter username and password</b>".</p>

### 3.4. Forgot Password (UC\_MAB\_GN\_03):

Use Case Name	Forgot Password							
Actors:	Registered user							
Purpose:	This use case describes the actions when Forgot Password is clicked on login page by the user.							
Trigger:	"Forgot Password" on login page.							
Preconditions:	User should not be logged in already.							
Normal Flow:	Forgot password module will allow user to change their password.							
	<table border="1"> <thead> <tr> <th>S.No.</th><th>Requirement</th><th>Comment</th></tr> </thead> <tbody> <tr> <td>1.</td><td><b>Enter email id-</b> System shall require user to enter their email ID used while registration. <del>Or System shall allow user to retrieve their password by entering the</del></td><td><del>For Phone Number, we will integrate the Twilio API to get the OTP on the mobile number.</del></td></tr> </tbody> </table>	S.No.	Requirement	Comment	1.	<b>Enter email id-</b> System shall require user to enter their email ID used while registration. <del>Or System shall allow user to retrieve their password by entering the</del>	<del>For Phone Number, we will integrate the Twilio API to get the OTP on the mobile number.</del>	
S.No.	Requirement	Comment						
1.	<b>Enter email id-</b> System shall require user to enter their email ID used while registration. <del>Or System shall allow user to retrieve their password by entering the</del>	<del>For Phone Number, we will integrate the Twilio API to get the OTP on the mobile number.</del>						

		<p>registered mobile number.</p> <ul style="list-style-type: none"> <li>• Enter Phone Number</li> <li>• Enter OTP</li> <li>• Enter New Password</li> <li>• Confirm Password</li> </ul> <p>The email sent with the OTP should show the OTP first in the beginning of the email message. The reason for this is that when you have the app open and you requested the code, the email arrives and it show up at the top of the screen with the first sentence showing briefly, this may be enough for the user to see the OTP if it is mentioned in the first sentence. This allows the user not to leave the app and immediately enter the OTP faster</p> <p>Flexsin: Yes, users can be able to see the OTP in the notification they received. The email sent to user for retrieving their password will show the OTP in the beginning of the message so that they can just see the OTP without opening the mail.</p>	
	2.	System shall require to verify the email address	
	3.	System shall trigger an email with temporary password and a "password reset" link once email ID matches with any account.	User Shall require entering correct email ID if entered email id is not correct.
		<p>When a user clicks on a link to reset the password then user will direct to an application with a screen:</p> <ul style="list-style-type: none"> <li>• Enter New Password</li> <li>• Confirm Password</li> <li>• <b><u>Submit</u></b></li> </ul> <p>After submission, a pop-up will be displayed with a message: "You have successfully created your new password". <b><u>Click here to login again.</u></b></p>	
Alternative Flows:	<p><b>Alternate flow 1: Back to login</b></p> <p>User can choose to go back to the login page.</p>		

Email Trigger	<p><b>ETR01_UC_MAB_03</b></p> <p><b>Subject:</b> Reset your password</p> <p><b>From:</b> no-repply@yourdomain.com</p> <p><b>To:</b> &lt;SUBMITTED_EMAIL_ADDRESS&gt;</p> <p><b>Email Content:</b></p> <p>Dear &lt;SCREEN_NAME / USERNAME&gt;,</p> <p>You told us you forgot your password. If you really did, click here to choose a new one:</p> <p><a href="#">Choose a new password</a></p> <p>Need the raw link?</p> <p><a href="https://www.yourdomain.com/rp/qbvlXPzpugflZQTzxhv9uTb9evTqeYL">https://www.yourdomain.com/rp/qbvlXPzpugflZQTzxhv9uTb9evTqeYL</a></p> <p>This link is valid only for 3 days.</p> <p>If you didn't mean to reset your password, then you can just ignore this email; your password will not change.</p> <p>Thanks &lt;Meet At Bar&gt; Team</p>

### 3.5. Sign Up (UC\_MAB\_GN\_04):

Use Case Name:	Sign Up		
Actor:	General Users		
Purpose:	This functionality will allow the visitor to become a member by entering some details.		
Description:	Users will be able to sign-up into the app by submitting the details.		
Normal Flow:	When user clicks on the Sign Up option then a new screen will be displayed with the fields user have to enter. Fields are:		
	S.No	Requirement	Comments
	1.	<b>Step 1:</b> <b>Username</b> <b>Email Address</b>	Database will check the availability of the entered username.

	<b>Password</b> <b>Confirm Password</b>  <b>Go to Step 2<sup>nd</sup>:</b> <b>Enter Age</b> <b>Height</b> <b>Select Gender</b> <b>Select Marital Status</b>  <b>Go to Step 3<sup>rd</sup>:</b> <b>Upload Your Introduction Video</b>  <b>Username*</b> - System shall allow the user to enter the username.  If username is already existed then system will ask the user to enter the different username.	
2.	<b>Email*</b> - System shall require user to enter their Email address and verify it.  When a user completes the 1 <sup>st</sup> step of the registration then system will send the email to the user to verify the email address.	Email address must contain a @ and dot. Email should be unique.  Email verification status at <b>"My Verification"</b> screen will be mark as verified once a user verifies an email.
3.	<b>Password*</b> - System shall require the user to enter an alphanumeric password.	Password length could be 6 to 12, which must contain at least a number, a Capital Letter, a special character and normal character as well.
4.	<b>Confirm Password*</b> - System shall match the values entered in password and confirm password field.	If doesn't match user will be require to fill both fields again.
5.	<b>Terms &amp; Conditions &amp; Privacy Policy*</b> - System shall require user to select terms & condition check box.	Compulsory field
6.	<b>Continue to Next Step-</b> <b>System shall allow the user to</b>	System will check and verify if all the required

		<p><b>go to next step</b></p> <p><b>NOTE:</b> Users will be able to access the application without verifying an email address. System will ask the user to verify the email address randomly i.e. when a user wants to see the verified status of another user.</p> <p>User can click on Back Button to go Login Screen – Back Button</p>	<p>fields are entered by the user.</p> <p>After the 1<sup>st</sup> step, system will trigger an <b>email with OTP to the user to confirm an email address by entering the OTP provided in the mail.</b></p>
	7.	<p><del><b>Already have an account?</b></del></p> <p><b>NOTE:</b> As there will be back button on the Signup screen, so we're removing the text "Already have an account".</p>	User will direct to a login page.
	8.	<p>After the 1<sup>st</sup> step, system will trigger an <b>email with OTP to the user to confirm an email address by providing the email address in the mail.</b></p> <p><b>This has been changed to OTP please see note above</b></p> <p><b>Flexsin: Yes we are clear with the point.</b></p> <p><b>2<sup>nd</sup> Step of Registration Screen –</b></p> <p><b>Select Date of Birth –</b> Using Calendar</p> <p><b>NOTE:</b> Using the date of birth entered by the user, we will calculate the Age of the User to display over the profile.</p> <p><b>Select Height –</b> In Cm Only</p> <p><b>Select Gender</b> <b>Male   Female</b></p> <p><b>Pls remove transgender</b></p> <p><b>Flexsin: We have done this.</b></p> <p><b>Select Marital Status</b> Single   Married  </p>	<p>In 2<sup>nd</sup> step, users will be able to enter the details for the profile.</p> <p>Users will have an option to skip the 2<sup>nd</sup> step by clicking on next button. However, there will some penalty to the users:</p> <p>Users won't be able to view the answer of the same question of other user if a user doesn't have answer of the question.</p> <p>If a user wants to see the answer of another user then a system will pop-up: <b><u>Fill Your Answer to see answer of another question.</u></b></p>

	<p>Divorced   Separated   Widowed</p> <p><b>Continue</b></p> <p><b>NOTE:</b> Users will be able go to next screen if a user doesn't want to enter the details.</p>	
9.	<p><b>3<sup>rd</sup> Step –</b> Once a user skip by clicking on next button   or filled the 2<sup>nd</sup> step information then 3<sup>rd</sup> step is to upload Introduction Video.</p> <p><b>Introduce Yourself</b> When a user clicks to upload video, Native Phone Camera will be opened to click the video. There will be a button to start recording the video with a timer for the video. Max. Time of the video would be 10 sec. However, user can do it for 5 sec as well.</p> <p><b>View Video Capturing</b> Start Video to Record <b>Submit</b></p> <p><b>View Sample Video (Provided by Client)</b> NOTE: Video will be displayed automatically when a user comes at this screen. User does not require clicking on a play button. Submit   Cancel</p> <p>After uploading the video and submit, user will be able to view the uploaded video over the Sample video and it will be played to see.</p> <p>User cannot skip this part they have to have a video. Is there</p>	<p>Users will be able to upload up to 5 sec video which will be used to breakup into the screenshots so that user will select a screenshot to make the profile picture and photos.</p> <p>Many (Up to 5 per screen – 4 screens would be there) screenshots will be displayed to the user instead of only 5 and user will be able to select the screenshot to make a profile picture.</p> <p>After submission of the photos, all the details will be saved under user's account.</p> <p>Once a user submits the video and select photo.</p>

	<p>a way to detect that the video should have a face in it an not just any randomness.</p> <p>Flexsin: Yes, It is mandatory for users to upload their introductory videos.</p> <p>The video taken should be displayed in the same style as seen in the barhopper profile page.</p> <p>Flexsin: Yes, the video will be displayed in the same manner as it is displayed in the bar hopper profile page.</p> <p>We need to add instruction on what is expected on the video. "Please show one person on the video and no nudity and vulgarity.</p> <p>Is there a way to detect the presence of a face or any nudity in the video?</p> <p>Flexsin: Yes, we will display message to users about the content/video they have to upload.</p> <p>While to detect the presence of face, we are using face detection technology. We are using a SDK available for iPhones to perform this face recognition. On the other hand we are not sure for the nudity, please confirm.</p> <p>The same video frame based on the original design</p> <p>Flexsin: Okay, We do understand</p> <p>User will direct to the next screen where user will see the screenshot to select the picture for profile picture:</p> <p>Choose Your Profile Picture:</p> <p>View 5 Screenshots in One</p>	
--	---	--

	<p>Screen</p> <p>Select Any one Photo Or User can Swipe Right   Left to see more options for the screenshots.</p> <p>Screenshot 1 Screenshot 2   3   4   5.</p> <p>Select using Checkbox by clicking on any screenshot.</p> <p>Re-upload Video – when a user clicks on it, user would have to upload video again to take the screenshot.</p> <p><b>NOTE:</b> If a user wants to see more options for the screenshots, user can swipe right   left to see.</p> <p>User will also have an option to go back if a user wants to upload the new video again.</p>	
Alternate Flow:	<p>Users will be able to login into the Facebook instead of Signup manually.</p> <p>When they sign up through facebook, the users will still need to fill out the same information like the height weight</p> <p>Flexsin: Yes, User will need to fill out the same information like the height weight even if they are logging or registering via Facebook as it will fetch only name, email and photos from Facebook and rest of the details required will be filled manually.</p>

--	--	--

	<p>female to Looking for serious and committed relationship. VIP can filter all."</p> <p>Flexsin: Yes, the question would be "What is your interest in Meet at Bars?" instead of " What is the purpose of Meet at Bar".</p> <p>With respect to the above question, given below are the four options among which user can select.</p> <p><b>Find nearby bars</b></p> <p><b>Find nearby events</b></p> <p><b>Meet up with old friends</b></p> <p><b>Find new relationships&gt;</b></p> <p><i>selecting this option would display the following options among which user can make their selection</i></p> <ul style="list-style-type: none"> <li>Male looking for female</li> <li>Female looking for male</li> <li>Male looking for male</li> <li>Female looking for female</li> <li>Looking for friends with benefits</li> <li>Looking for serious and committed relationship</li> <li>Looking for a sugar daddy/mommy</li> <li>Looking for dominatrix/BDSM</li> <li>Looking for swing partners/group sex</li> <li>Looking for other unique relationships</li> </ul> <p>Please note that we need to display this as discussed</p> <p>Purpose</p> <ul style="list-style-type: none"> <li>Find nearby bars</li> <li>Find nearby events/promotions</li> <li>Meet up with old friends</li> <li>Find new relationships</li> </ul> <p>(IF find new relationships is</p>	
--	---	--

	<p>checked, a different screen or prop up asks the following)</p> <p>Looking for</p> <ul style="list-style-type: none"> <li>Male looking for female</li> <li>Female looking for male</li> <li>Male looking male</li> <li>Female looking for female</li> </ul> <p>Special relationships</p> <p>(Please have limits to these choices so that a user can not press on both Mae and female choices in other word a user can not be a male looking for female and also be a female looking for female)</p> <p>(When the user clicks Special relationships then the choices of what type of special relationship will drop down then from there they can choose and please have and ask me option)</p> <p>We need to make this easy for the filtering process on bar hoppers landing page</p> <p>Flexsin: Okay, we have already designed this screen as per your requirement.</p> <p><b>CESAR:</b> For special relationships, if any user had enabled "ASK ME" option, their profile would also be displayed in the filter results.</p>	
---	---	--

If any user selects purpose of the app while registration as "Find New Relationship" along with other options, then only this purpose will be displayed on their profile page while the other purposes will not be displayed. And if they select the other purposes except "Find New Relationship", then purpose tab will not be displayed.

**Make it:** Private **(Toggle Button)**

Users will also be able to make their responses "Private" by clicking on "Private" button. In case if they haven't clicked on "Private" button, then their responses will remain public to all the users of the app.

~~Find nearby bars~~

~~Find nearby events~~

~~Meet up with old friends~~

~~Meet new friends~~

~~Find a committed relationship~~

~~Find a casual/fun relationship~~

~~Find a supportive relationship~~

~~Find a Special Relationship~~

~~Select Particular Relationship~~

**Make it:** Private **(Toggle Button)**

The choices on this page will be the following

Male looking for female

Female looking for male

Male looking for male

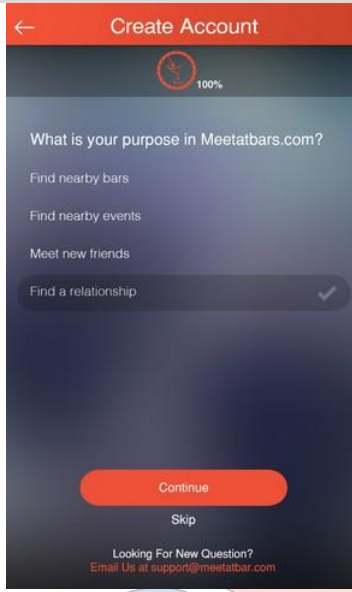

Female looking for female

		<p>Looking for special relationships</p> <p>This five options will be on display first. The user may check more than one but it has to be a male option or female option. For example a user who check Male looking for male can not check check another option that says female looking for... However, the user can additionally check the special relationships option. When the user checks the special relationship option, then and only then will the options off the other special relationships will show and please add the ask me option</p> <p>Flexsin: we understand it. We will do so</p> <p><b>NOTE:</b> Users will also be able to view the multiple purposes and it will be displayed over the user's profile.</p> <p>Please ad a return button in case the user want to redo the video.</p> <p>Flexsin: The return button is already there to redo the video.</p> <p><b>Developer Comments:</b> Video is already uploaded on server. If we go return again we have to upload the video again. As discussed with client we give a confirmation pop up before finalizing the Video. So user will be known that he/she can able to change the video later from his profile.</p>	
	2.	<p>Your body type?</p> <p>Straight</p> <p>Slim</p> <p>Average</p>	<p>If any user wants to add a new question into the list then user can request to Meet At Bar by writing an</p>

8.	<b>Current number of children?</b> None 1 2 3 More than 3 <b>Make it: Private</b> <u>(Make it: Private</u> <u>(Toggle Button)Button)</u>	
9.	<b>Do you drink alcoholic beverages?</b> Yes No <b>Make it: Private</b> <u>(Make it: Private</u> <u>(Toggle Button)Button)</u>	
10.	<b>Do you smoke?</b> Yes No Occasionally <b>Make it: Private</b> <u>(Make it: Private</u> <u>(Toggle Button)Button)</u>	

Alternate Flow:	<p>Users will be able to skip the questions by clicking on next screen and direct to the home screen of the application.</p> <p>Users will be able to complete their profile from my profile section.</p>
Post Condition:	<u>After submitting the answer, user will direct to the home screen based on the purpose selected.</u>
Screenshot:	 <p>Please add fill out all the questions and earn 5 free gift credits and 5 Drink invite credits</p> <p>Flexsin: We understand that, we will have to display a message to users stating that "fill out all the questions and earn 5 free gift credits and 5 Drink invite credits" to encourage them to fill all the information.</p> <p>We believe that user can send 5 gifts and 5 drinks to other users.</p>
Comments:	<p>All the questions will be pre-defined at the development level. If Client wants to add any new question then it would have to done by the developer. Admin will not able to add the questions from the backend.</p> <p>The users should be able to select all options that apply for the questions.</p> <p>Flexsin: Query: Regarding the Privacy Button, please let us know why we require the Privacy option here.</p> <p>We have discussed this over skype, we were going to add th "ask me "</p>

option under the special relationships and it will display it on the barhopper profile

We also discussed changing "purpose" in the barhopper profile to "Interested in finding new relationships? Yes or No. If Yes then it will show what type of relationships and if you are interested in special relationships. If this is made private then it will show ask me if you chose a special relationship

Flexsin: Yes, we do understand that the "Purpose" in the Barhopper profile would be changed to "Interested in finding new relationships" with an option "YES" or "NO". if they select "YES" then they will be able to view different types of relationships among which they can make selection for the ones in which they are interested in. if these relationships selected is made private then there would be an "ASK ME" button on their profile.

For Warning, whether the warning will be displayed for the first time using pop-up or it will be text under the question with a note.

The privacy button should only apply if the person chooses "Find a new relationship" because then they will be asked very sensitive information I think a pop up gets more attention.

Flexsin: Yes, we do understand that the privacy button "ASK ME" would only be there only if a user has selected "Find New Relationship". We will have POP-UP here.

**Purpose to show Warning:** A warning that if made private, your profile will not appear in search results which may decrease chances of meeting people of similar interests.

The warning should mention that "When you make a detail about you private, your information will not show up on filter results to keep your privacy. This may decrease the chances of certain people finding you. Other users will send you a request to see your private information.

Flexsin: Ok We do understand that the warning will display the information "When you make a detail about you private, your information will not show up on filter results to keep your privacy. This may decrease the chances of certain people finding you" while other users can send them to see their private information.

### 3.8. Pop-up to Allow (UC\_MAB\_GN\_08):

Use Case Name:	Pop-up to Allow		
Actor:	Registered Users		
Purpose:	This pop-up feature allows the app to do the functionality.		
Description:	For the first time user (new user), there will be some pop-up will be displayed to accept.		
Normal Flow:			
	S.No	Requirement	Comments
	1.	<p>Enable Location – Yes   No - Will ask for new user</p> <p>If the user chooses No on enabling location, we need to have a pop up giving them option to turn it on and reminding them that the app will not work if the location is enabled. We need to have pop ups to do this to encourage the user to turn it no so the app can be functional. We need to make it easy for them to turn it on by clicking yes on the pop ups</p> <p>Flexsin: Yes, we do understand that the app will work only if user has enabled their location. In case if they haven't enabled their location then a POP-UP will be displayed to them with information to enable location access along with "YES" option so that they can easily enable their location..</p> <p>Developer Comment: If user disallows location once, he can only allow from settings. We give him a pop up “Please allow the location from Settings”. They can search for the bars and bar hoppers manually as well.</p>	<p>When a user enables the location then users will be able to view the nearby Bars   Bar Hoppers.</p> <p>If No, users would have to select the location to see the Bars and Bar Hoppers from the Filter Option.</p> <p>A Note will be displayed: In order to find nearby bars, events and people you must answer yes to enable location. However, there will be an option to search the people, bars, events by location as well.</p>
2.	Allow Push Notification – Yes	This push notification can	

		<p>No – Will Ask for New User</p> <p>We need to enable the push notifications if allowed by apple. We need to make all as default unless required by apple. If we are required to ask permission, then we need to provide pop ups to encourage them to turn it on when they are using the app</p> <p>Flexsin: We understand that all the notifications will be enabled by default. In case if some permission is required then we will have the pop-ups so that user can turn it on whenever they will be using the app.</p> <p>Developer Comment: Apple not giving permission to allow push notification by default. If user disallows Push Notification once, he can only allow from settings.</p> <p>We give him a pop up “Please allow the push notification from Settings”</p>	<p>be enabled form the notification setting as well.</p>
	3.	<p><b><u>Push Notification-</u></b></p> <ul style="list-style-type: none"> <li>When someone request to view answer of any question</li> </ul> <p>This request is to view private information. If the answer is yes then all private information will be accessible by the person requesting permission. We need to explain this along with the request email</p> <p>Flexsin: the request to view private information will be accessible by the person requesting permission but we are not able to send any</p>	

		<p>request email</p> <ul style="list-style-type: none"> <li>When someone viewed profile.</li> <li>When someone received invites for drink</li> </ul> <p>Question push notification means via email or by phone message?</p> <p>Flexsin: Push notifications will be sent through servers within the app, not via email or by phone messages.</p> <ul style="list-style-type: none"> <li>When someone send message</li> <li>When someone (Only Friends) logged-in into the app</li> </ul> <p>When someone sends a virtual gift, a push notification should also be sent</p> <p>Flexsin: Yes, a Notification would be sent whenever any user will send a virtual gift.</p> <ul style="list-style-type: none"> <li>When user's friend checked-in at Bar/Event</li> <li>When Event starts for which you've mark attended based on the Event Date and Time</li> <li>When user's friend posted any news.</li> <li>When someone posted any comment/like on his newsfeed</li> </ul>	
	4.	<p>Allow Send Message – Yes   No – It will ask when user go to Chat screen</p> <p>When someone sends a message to another user, there is a limit(10 x) of how</p>	<p>To send the request to get the OTP for the verification.</p>

	<p>many times the two people can send messages to each other before requiring each accept each other as friends. This functionality is to protect users from unwanted conversations from other users.</p> <p>Flexsin: Yes, We have already included this feature in the srs.</p>	
5.	<p>When a user open the User's profile page for the very first time and he/she haven't complete their profile then a pop-up will be displayed to the user:</p> <p><b><u>Complete Profile Button / No, Thanks</u></b></p> <p>When user's profile is uncompleted – Pop-up Instead of Push Notification after 100 clicks on app or browse 10 barhoppers.</p> <p>Also, when a user tries to view the question of any user and his profile is uncompleted then user will get pop-up to answer the question first then you will be able to see the answer of the another user.</p> <p>The notification process will be as described above.</p> <p>However, once the user has used the notification process example 10 times, and then then the app will start limiting the notification.</p> <p>Example, a user requests to see privates information or photos, the recipient will receive the request and respond. The sender will be</p>	<p>System will allow users to view 100 profiles before we send a pop up saying that they need to complete their profile.</p> <p><b><u>Scenario 1 – If Profile not completed:</u></b></p> <p>After they click 100 times, then system will send a pop up requiring them to fill out the basic profile to continue.</p> <p>Once they complete the basic profile then they can view another 100 users. Thereafter then scenario 2 applies where they have to wait 14 hours before they can do anything on the app that includes sending messages</p> <p>Flexsin: Yes, we do understand that once user will complete their basic profile then they will be able to browse 100 profiles of other users and after that once the limit is reached then user needs to wait for 14 hours to resume viewing unless they want to sign up for a paid subscription.</p> <p><b><u>Scenario 2 – If Profile</u></b></p>

	<p>notified that in order to see the response, they need to become a paid member.</p> <p>This mechanism can be used to a lot of the notification like invite for a drink or friend request or even messaging. Initially the notifications are available until the user show that they are using the app more and then that is when we limit the use of this functionality.</p> <p>Flexsin: Need to discuss it with you.</p> <p>In the beginning of the app, we want all functionalities free except for the VIP membership functionalities. However, once we accumulate enough users then we need to be able to activate the process as discussed. The process of monetizing is based on slowly limiting the functionalities accessible to the users. There needs to be a switch in the SUPER ADMIN that will allow us to go into the monetization of the app as discussed.</p> <p>We will only be limiting the "Number of Swipes" and "Number of Messages Get" feature. We will limit these features while writing the code. if any users crosses the limit of "Number of Swipes" then they will have to wait for the other 8 hours and if they crosses the limit of "Number of messages get" they will have to wait for the 14 hours</p>	<p><u>Completed:</u> If their profile is completed then then they will be told that the limit of 100 clicks has been reached and the user needs to wait <u>14 hours</u> to resume viewing unless they want to sign up for a paid subscription</p> <p><u>Scenario 3 – If Bar Hopper wants to see Profile Info:</u> When bar hoppers click on view more details, or view personal information, user will be able to view the information but only information that they have answered.</p> <p>In scenario 3 , the personal questions or details of bar hopper profile can set this as private which means a request to access this information is required Flexsin:okay</p> <p>If there are questions not answered then the bar hopper needs to answer each question unanswered in order to view the other persons answer.</p> <p>Other user would have to accept the request to give the access to see info.</p>
--	--	---

	<p>to get these limits again, else they can upgrade their plan.</p> <p><b>CESAR:</b> In scenario 3, the personal questions or details of bar hopper profile can set this as private which means a request to access this information is required.</p> <p><b>FLEXSIN:</b> okay</p>
Alternate Flow:	Users will be able to enable the pop-up from the setting section in the app as well.
Post Condition:	<p><u>After allow the pop-up, user will direct to a page:</u></p> <p>Default Page would be depend upon the following scenario:</p> <ul style="list-style-type: none"> <li>• <b>If a user is looking for Bars:</b> User will direct to a Bar listing page.</li> <li>• <b>If a user is looking for Events/Promotions:</b> User will direct to an Event/Promotion Page.</li> <li>• <b>If a user is looking for Friends/Bar Hoppers/Relationship:</b> User will direct to a Meet Page.</li> </ul> <p>For the multiple purpose selection, we will redirect the user to the Bar landing page/Event Page.</p>

1.	<b>Search</b> – Users will be able to search for the Bars by: Bar Name Bar Type Search tab will be opened over the top when a user clicks on Search Icon.	Based on the Bar Name and Type, listings will be displayed.  To <b>Prevent the duplicity</b>								
2.	<b>Bar Listings:</b> Users will be able to view the list of the bars based on the	Users would have to select the location (if location disabled) to see the Bar								

	<p>GPS location (if enabled).</p> <p><b><u>Bar 1</u></b>  <b>Bar Images</b>          NOTE: Users will be able to swipe right or left to view another images.  <b>Mark Favorite</b>   No. of Favorite (Heart Icon color changed)          NOTE: Users will be able to click on Heart Icon to mark it fav. And Count will be incremented by one. Heart color will be changed to yellow when mark fav.          Favorite will function like. Follow the bar so that if there is a promotion , all those whom mark favorite will be notified          Flexsin: Yes, we understand that if user marks any bar as their favorite then they will be able to get updates about the activities (Like Promotions) at the bar.          This feature of open or close should only be functional on registered bars because many times google api information may be wrong          Flexsin: okay we will do so</p> <p><b>Open Status</b> - Closed   Open – System will automatically display the ribbon for open   closed based on the opening   closing timing of the Bar.          Bar Icon          Bar Name          Location – We will display the address of the Bar.          No. of Checked-In Users – Check-in will be done automatically. However, user will have an option to do the</p>	<p>listings.</p> <p>Location will be selected from the Filter Option.</p> <p>When a user scroll down to see more Bar listings then the two things will be fixed at the top:          Search Tab with MAN Icon          Tab (Bar and Event   Promotion)</p> <p><b>Case – If no Image Available:</b> if there will not be any Image available for the Bar. In that case, we have a defined image for the Bars and user will be able to view the Avatar kind of image or No Image Available.</p> <p>No. of People Chatting in Bar Chat:          Users will be able to enter into the Bar Chat by just clicking on the Bar Chat button.          Only who entered into the Bar Chat and chatting currently, System will count the no. of users.          NOTE: Users will be able to leave the room from the Bar Chat detail page using 3 Dot Menu Option.          From detail page, when a user click on 3 Dot Menu Icon, three option will be displayed:          Leave Room          View Members</p>
--	--	--

	<p>check-In manually.</p> <p>Distance Away from Current Location – Based on the GPS location</p> <p>No. of People Chatting in Bar Chat</p> <p><del>Best in Drinks &amp; Dance</del> (Star Rating) – This will be displayed based on the no. of ratings submitted by the user and which parameter has the highest rating.</p> <p>Changed to star rating , results averaged and the best category displayed in the bar landing page</p> <p>Flexsin: Yes, we will change the text “Best in Drinks &amp; Dance” to “Start rating”. Also the best category (parameter which has highest rating) will be displayed on the landing page of bar.</p> <p><b>NOTE:</b> If there will be two parameters, then only one parameter of Best will be displayed at a time.</p> <p>Share Bar – When a user will click on Share Bar then the Native Applications i.e. Facebook   WhatsApp   Twitter   Instagram</p> <p><b><u>Bar 2   3..so on.</u></b></p>	
	<p>3. <b><u>Filter Bars</u></b></p> <p>Select Location</p> <p>Select City   State   Country</p> <p>NOTE: We will get the information for City   State   Country from the backend.</p> <p>Filter should show city and state or by distance. It should not show both because this can be confusing</p> <p>Flexsin: Yes, we do understand that Filter would not have “Both” option.</p>	<p>When a user applied any filter then Filter Icon on the Bar Listing will be changed to Yellow. Else, it will be Orange Color.</p> <p>Also, if any user wants to reset the Filter then there will be an option to Reset Filter Options.</p> <p><b><u>NOTE:</u></b></p> <p>There will be some restriction to use the filter</p>

	<p><b>Developer Comment:</b> Please clarify the functionality. Either user can search via City, State or by distance. If distance enabled then city/state criteria will not be applied.</p> <p>OR – Instead of Location ,user Distance Radius</p> <p>Distance Away</p> <p>Please note the comment i made on filter options of types of bars</p> <p>Flexsin: we have mentioned our comment there.</p> <p>Select Distance using bar radius</p> <p>Type of Bar</p> <p>Select Type of Bar</p> <p>Bar Chat – Enable   Disable</p> <p>Drink Specials – Enable   Disable</p> <p>We need to communicate to the user that this drink special is for members only and this is in connection when the bar registers in the bar owner admin they can answer yes or no if they want to offer a drink special package to our members. We can explain that in order to avail of the drink special for meet at bars members that they have to show their app to the server or bartender</p> <p>Flexsin: Yes, we understand that user will get information about the drink specials in case if the respective bar is offering that. In order to avail this drink special user must have to show their app to the</p>	<p>for each section.</p> <p>If any free account user wants to have all filter options then they would have to purchase the membership plan to access the filters.</p> <p>However, free account user can use only limited parameters in the filter option.</p> <p>Filters for Free Account:</p> <p>Select Location</p> <p>Select Type of Bar</p> <p>Bar Chat</p> <p>Else, if a user wants to access all the features then user would have to purchase the membership plan.</p> <p><b>Filters for Paid Account includes:</b></p> <p>Drink Specials</p> <p>Entertainment</p> <p>Opinion Filters</p>
--	---	--

		<p>server or the bar tender. When a user filters the bars who're providing drink specials then only those bars will be displayed.</p> <p>Entertainment – Enable   Disable Meet At Bar Special – Enable   Disable Live Music – Enable   Disable</p> <p>Opinion Filter (Select Option – Multiple Option) Select Best Beer/Cocktail Bars Select Best Looking People Bars Select Best Bar Tender Staff Select Best Entertainment <b>Apply   Reset</b></p>	
	4.	<p><b><u>Event   Promotion</u></b> Event or promotion should have a link to the bar profile creating the promotion. Flexsin: okay we will do that but only if bar is registered with us or we are getting the list from google API</p> <p>When a user clicks on Event   Promotion Tab then users will be able to view the list of the Events   Promotions</p> <p><b><u>Event   Promotion 1</u></b> Images that are uploaded to the promotions should allow a Iphone image or photo to be uploaded. It needs to allow adequate size file. Flexsin: The size of the image would be 100-200 KB. Also we can compress the size of the image which will be uploaded from browser without affecting their quality. Event Image</p> <p>The images here uploaded by</p>	<p>Events   Promotions can be created by the Bar Owners or Event Organizer   Promoter will create the events   promotions as well.</p>

	<p>the user should be displayed in the same dimensions on the promotions page. In the current design there is a mock up of pics that are unrealistic.</p> <p>Flexsin: Okay</p> <p>NOTE: Users will be able to view the images uploaded by the Bar Owners   Event Organizers.</p> <p>Bar Owners   Event Organizers will also have an option to select the template for the Events   Promotions from the dashboard.</p> <p>Mark Favorite   No. of Favorite – Click on Heart button mark fav.</p> <p>How can users post on the meet at bars Facebook page?</p> <p>Flexsin: No, users will not be able to post on the Meet at Bars Facebook page from app, as Facebook will not allow users to post anything from one respective app to Facebook app.</p> <p>Event Days Left – Based on the Current Date and Event Dated Event Name</p> <p>Bar Name – For which Bar is organized.</p> <p>Event Date</p> <p>Distance Away</p> <p>Share – Share via Facebook   WhatsApp   Twitter   Instagram</p> <p>No. of People Interested – Users will be able to show their interest for the Event from the detail page of the Event.</p> <p>View Flyer – Users will be able to view the Flyer uploaded by the Event Organizer   Bar Owner. When a user click on it then an image will be</p>	
--	--	--

		displayed with an option to save it or close it.  <b><u>Event / Promotion 2 / 3..so on.</u></b>	
	5.	<b><u>Filter Events / Promotions</u></b> Price – By Range for Events Select Location Select City   State   Country OR – Instead of Location Distance by Radius Event Type Show Only Event   Promotion or Both Select Time-Slot and Select Date Range Allow the user to select city state or by distance, pls show only one or the other by giving them a choice of which one Flexsin: We have mentioned both the filters i.e. either by city, state or by location, just to give a choice, but during development time, the one chosen by you will be considered. The two options for filter are necessary but the users should have a choice of either or. In other words the user can choose one between distance or city and state and not both Flexsin: okay. we will do so	
Alternate Flow:	Users will be able to browse the Nearby Bars and Events   Promotions based on the GPS location.		
Post Condition:	Users will be able to view the detailed information about the Bars and Events   Promotions		

Screenshot:

Bars will be displayed based on popularity. The more favorites they have the higher ranking they will be. Just a reminder, we offer boosting of the bars ranking by paying meet at bars. When bars are boosted, their name appears at the top in their area, their position will be based on first come first served. Please see the system in the previous app.

Flexsin: We will consider the popularity based on no. of favorites marked by the users only, but boosting of the bars ranking by paying meet bars will not be possible.

Comments:

### 3.11. Bar Information Screen & Event | Promotion Screen (UC\_MAB\_GN\_11):

Use Case Name:	Bars   Events & Promotion Detail Information
Actor:	Registered Users
Purpose:	<p>This screen is to display the information about the particular selected from the listings.</p> <p>Also, when a user clicks on particular Event   Promotion then user will be able to view the information about the Event   Promotion.</p>
Description:	Users will be able to view the information about the Bar.

Normal Flow: When a user clicks on Bar tab then the list of the Bars will be displayed to the user.

~~Client: With regards to the voting system, we want the votes however we will use the votes to rank the bars with regard s to displaying the order of the bars.~~

As discussed rating system. The best rated attribute will be displayed on the bar landing page and only 4 stars and above will be listed. If is less than 4 stars, nothing will be displayed on the landing page for that particular bar

Flexsin: Okay we do understand that the parameter or the best rated attribute will be displayed on the bar profile page in case if the rating is 4 star and above. While in case if the rating is less than 4 stars then no attribute or parameter will be displayed on their profile.

Flexsin: As discussed over Skype, you want the ratings system instead of Voting, please confirm it again as we have updated the SRS document as per the rating system.

There will be two sources to get the Bar Listings:

- **Google Places API** (Client will provide us the API).

The bar owner can enter own information. if not on google api . Info will need longitude and lat so that gps and check in will be functional. Pls look into how we can enter non listed bar through google api instead of our own.

Flexsin: Development will assist us on the same.

NOTE: We can only display the information on Bar listing and Bar detail page which we can get from Google Places API.

- **BAR OWNER MEET AT BAR DASHBOARD**

S.No	Requirement	Comments
1.	<p><b>Bar Information:</b> Users will be able to view the Bar information based on the selected Bar from the listing.</p> <p><u><b>Bar Information</b></u> Bar Name <u><b>Report the Bar</b></u></p>	<p><u><b>Report the Bar:</b></u> When a user report the information if any information is in-correct or in-appropriate content then user will have an option to submit the report to the super-admin</p>

	<ul style="list-style-type: none"> <li>Select Reason   Enter Your Own Reason</li> </ul> <p>Bar Image (Images will be moved by Swiping Left-Right)</p> <p>Bar Location – Address will be displayed</p> <p>Distance Away</p> <p>Open   Closed Status – Based on the Bar Timings</p> <p>Opening Hours</p> <p>Phone Number</p> <p><b><u>Submit Feedback</u></b></p> <p>When a user submits the feedback then user will be able to view the Feedback submitted by clicking on the Feedback Icon again.</p> <p><b><u>Share Bar</u></b> – Users will be able to share the Facebook   WhatsApp   Instagram   Twitter.</p> <p><b><u>View Average Ratings of Bar in Yellow button</u></b></p> <p>Beer   Cocktail: 4.5 Star</p> <p>Best Looking People: 4 Star</p> <p>Bar Tender: 3 Star</p> <p>Entertainment: 4 Star</p> <p>NOTE: Only average rating would be displayed to the user. User won't be able to view the individual ratings submitted by the user.</p> <p>No. of People Chatting</p> <p>Type of Bar</p> <p><b><u>View No. of Member Checked-In</u></b></p> <p>View No. of Listings: Member Username   Profile Picture   Online Status</p> <p>Option to Manual Check-In</p> <p>View How many Users have checked-in</p> <p><b><u>View Page of Member</u></b></p>	<p>and to the Bar Owner as well.</p> <p>Bar Owner from the dashboard will be able to see the report submitted by the Bar Hopper from the app with the reason.</p> <p>Super Admin will also be able to view the reports submitted by the Bar Hopper for any Bar.</p> <p>Instead of calling it report the bar, we should call it i "Report" because report the bar sounds like the bar is doing something wrong. Then under report you can have report to bar owner or report to meet at bars</p> <p>Flexsin: We will change "Report to bar owner" to "Report" only. The notification about the bar owner would be sent to the both "Bar Owner" and "Admin of Meet At Bar". Only admin (Meet At Bar) will have an ability to view the reported content.</p> <p><b><u>Share Bar:</u></b> Users will be able to share the Bar information with their friends. When a user clicks on Share Icon then Native App (Installed on iPhone) will be displayed to the user and user will be able to select the App to share the Bar Information.</p> <p>NOTE: As per the security concern of Facebook, we cannot share the actual pre-defined data to Facebook from the app.</p> <p>Can we share the data</p>
--	--	---

	<p><b><u>Checked-In List:</u></b>  <b><u>User Name 1</u></b>          User Profile Picture          Distance Away          Invite for Drink          Send Message  <b><u>User Name 2   3..so on.</u></b></p> <p><b><u>Scenario of Check-In mentioned below in this use case.</u></b></p> <p><b><u>View Photos</u></b>          Photo 1   2   3..          NOTE: Users will be able to scroll left   right to see more photos.</p> <p>When a user click on photo then image will be displayed in a screen with exact resolution (based on the size of the photo) and X option to close the window of opened photo.</p> <p><b><u>Your Opinion</u></b>  <b><u>NOTE: This opinion will also help to display the Bar on the top.</u></b></p> <p>Beer   Cocktail: View Average 4.5 Star          Submit Rating (1 to 5) using Star – that would be only 1, 2, 3, 4, 5.</p> <p>We will display bar ratings that are 4 stars and above on bar landing page. Ba's that have low rating 3 and below stars will not have their top ratings displayed. In place of the ratings, er will just leave that space on the bar landing page blank          Flexsin: Okay, we do understand that only 4 star</p>	<p>from meet at bar face book page posting to the app?          Flexsin: No data cannot be shared from meet at bar face book page posting to the app.</p> <p><b><u>Submit Feedback:</u></b> When a user clicks on submit feedback icon, and then a screen will be displayed to the user to submit the experience with the Bar. Bar Owner will be able to view the feedback submitted by the Bar Hopper.          NOTE: Bar Hopper will only be able to submit the feedback for the Bar owner once a user checked-in: Only If user has checked-In before and haven't submit the feedback yet.          NOTE: When a user submits click on Feedback button then user will be able to view submitted feedback. Also when a user checked-in again and wants to submit the feedback, user will be able to view the previous feedback and have an option to submit new feedback.          Each feedback will be displayed for every Bar.</p> <p>Feedback should be limited to one per barhopper per day not the number of check-in so there is no abuse          Flexsin: will users be able to submit their feedback "N" times without check-in in any event. Please</p>
--	---	---

	<p>and above rating will be displayed on the bar landing page. In case if any bar has ratings below 4 than the rating will not be displayed and the space will remain blank</p> <p>Best Looking People: View Average 4 Star Submit Rating (1 to 5)</p> <p>Bar Tender: View Average 3 Star Submit Rating (1 to 5)</p> <p>Entertainment: View Average 4 Star Submit Rating (1 to 5)</p> <p>NOTE: Based on the rating submitted by the user, users will be able to view the average ratings for each parameter and listings will be displayed which Bar has Best Looking People   Beer/Cocktail   Entertainment   Bar Tender</p> <p><b><u>Promotions By Bar</u></b> <b><u>Events by Bar</u></b> <b><u>View Facilities</u></b> Facility 1 Facility 2   3..so on. <b>NOTE:</b> Facilities will be displayed to the user with name and Icon of facility. Facilities will be pre-defined by Admin for the Bars.</p> <p>We haven't created the icons for each facility. Once Client will freeze the names for the facilities then we will update it.</p> <p>Also, the facilities will not be updated. This should be pre-defined at the Bar Owner</p>	<p>confirm.</p> <p><b><u>View Average Ratings of Bar:</u></b> Users will be able to view the ratings for any bar. The parameters to get the ratings would be opinion, user will submit the rating for each parameter instead of Voting and user will be able to view the ratings for individual parameter as well.</p> <p>On Yellow Tab on Bar Information Screen, Tab will be rotated and user will be able to see the ratings for each parameter along with the average rating as well.</p> <p><b><u>No. of People Chatting:</u></b> Users will be able to view the no. of people chatting in a Bar Group. When a user clicks on no. of people chatting then user will direct to a Bar Chatting page.</p> <p>Pls note that bar hoppers cannot enter the chat if they are not checked in the bar. They can only see the number of people. A pop of should explain that "in order to enter or see the chat activity, you have to be checked in the bar. Only VIP membership will allow you to see and join a chat without being checked in. Upgrade your subscription now, click here."</p> <p>Flexsin: Ok, we understand that it is mandatory for bar</p>
--	---	--

	<p>Dashboard.</p> <p><b><u>Scenario for Checked-In:</u></b></p> <p><b><u>If there is only One Bar at a time:</u></b>  When a user enters into the range in certain area i.e. 100-150ft and there will be one Bar only in that area.  Process for Check-In:  Then if user is stay at the same area for approximately 5 min. then application will do the auto check-in for a particular Bar.</p> <p><b><u>Process for Check-Out:</u></b>  If a user away from the Bar location on which he has checked-in around 100-150ft for 5 min. then application will do the auto-checkout from the Bar.</p> <p><b><u>If there are multiple Bar in an Area:</u></b>  When a user comes in an area where almost 4 Bars are there.</p> <p><b><u>Process for Check-In</u></b>  For manual check in we should allow a larger gps radius to confirm user location and allow manual check in. We should also allow a bypass of location gps in manual check in for instance the user is inside a large casino with multiple bars and gps is not accurate because the user is indoors. We need to examine the logic in large casinos with many bars as to how we handle the check in</p> <p>Flexsin: Development Team will assist us on the same.</p>	<p>hoppers to check-in the bar in order to enter in the chat. In case if they haven't check-in in any bar, they can only see the number of people of people checked-in along with a pop-up containing information "<i>in order to enter or see the chat activity, you have to be checked in the bar. Only VIP membership will allow you to see and join a chat without being checked in. Upgrade your subscription now, click here.</i>"</p> <p>When a user clicks on Bar Chat Button then they will direct to Bar Chat and he entered into the Bar Chat. Along with this, no. of members chatting will be incremented by one.</p> <p>There will be an option at Bar Chat Page to leave the room.</p> <p><b>Scenario for Bar Chat:</b>  Case 1: When a user enters into the Bar chat then members of users chatting will be incremented by 1. Bar Chat will be continued and user will get the push notification for the messages of the other users.</p> <p>If a user doesn't want to get the push notification for the messages then user will have an option to leave the room and after that user will not be able to send message in Group chat as well. However, user will be able to view the</p>
--	---	--

	<p>In that case when a user reaches in an approximate position i.e. 100-150ft then system will show the list of the Bars available in the app to select a particular Bar to check-In manually.</p> <p>Select Bar to Check-In View Bar Listings: Bar 1 Bar Name Bar Location Bar Image Select to Check-In Bar 2   3...so on.</p> <p>Manual check in should show bars in the vicinity of 1000 ft to the user and not allow the user to check in to just any bar in the list. Based on the gps, pls show bars that are in the 1000 ft radius.</p> <p>Flexsin: Okay, we will display the bars (based on GPS) which are in 1000 ft radius.</p> <p>For manual check in there needs to be a button on the bar profile page where the users can manually check in and check out but with gps verification. In other word a user can not check in when they are not in the 1000 ft vicinity of the bar</p> <p>Flexsin: okay we will consider this</p> <p>NOTE: We need to create the screens for the Select Bar for check-in.</p> <p><b><u>Process for Check-Out:</u></b> If a user away from the Bar location on which he has checked-in around 100-150ft for 5 min. then application will</p>	<p>previous chats.</p> <p>From the bar chat, users can click on the profile pic in the chat to see more information about the user or send a direct message and be able to click return to chat when finished viewing the profile.</p> <p>Flexsin: Yes, user will be able to see more information of other user by clicking on their profile from bar chat section..</p> <p>NOTE: Users will be able to view the online members in Bar Chat as well.</p> <p>Bar Hopper would have to checked-in to enter into the Bar Chat except (he is a VIP member).</p> <p>When a user checked-in into the new Bar then new Bar Group Chat will be created and start chatting. Existing Bar Chat will be continued for the users as long as they want.</p> <p>As discussed record of the chat will be save for a week</p> <p>Flexsin: Yes, the chat will be saved for a week.</p> <p><b><u>View No. of Member Checked-In:</u></b> Users will be able to view the no .of people who have checked-in the Bar. Users will be able to click on any profile to view the profile and start chatting with him/her if interested.</p> <p><b><u>Promotions By Bar:</u></b> Users</p>
--	--	---

	<p>do the auto-checkout from the Bar.</p> <p>Second Case: If a user wants to check-in into another Bar when he is already checked-in in nearby Bar.</p> <p>In that Case, user would have to check-in to another bar manually.</p> <p>When a user clicks on Check-In on another Bar 2 then a pop-up will be displayed: You have already checked-In at this bar 1, do you want to checked-out from Bar 1 Name? Yes   No</p> <p>The gps location of the user needs to verified with regards to the check in. The user needs to be int he vicinity</p> <p>Flexsin: Okay, We do understand</p> <p>When a user clicks yes then he'll check-out from Bar 1 and checked-in at Bar 2.</p> <p>In this second case scenario, we need to make sure that the user can check in to nearby bars and not one from across town. The gps location of the user should be in the vicinity of the manual check in</p> <p>Flexsin: Yes, users will be able to check-in to the bars which are available in their vicinity based on the GPS location (1000 Ft radius) not across the town.</p> <p>NOTE: Bar Hopper will be auto check-out after 30 min. from the closing hours of any Bar.</p> <p>I think the check-out should</p>	<p>will be able to view the list of promotions under this Bar.</p> <p>If Bar Owner has added the Promotion under this Bar then we will fetch the info.</p> <p>However, any promoter has created any promotion under this Bar, and then promotion will be displayed under this Bar.</p> <p>Users will be able to view the details of any promotion by clicking on any Bar.</p> <p><b><u>Promotion 1</u></b></p> <p>Promotion Image Promotion Name Mark as Fav. (View No. of Fav.) Bar Name Date of Promotion</p> <p><b><u>Promotion 2   View All – Direct to Promotion/Event Page</u></b></p> <p><b><u>NOTE:</u></b> Nearby Promotions will be displayed to the user under Promotion Tab.</p> <p><b><u>Events by Bar:</u></b> Users will be able to view the list of Events under this Bar. Users will be able to view the details of any Event by clicking on any Bar.</p> <p><b><u>Event 1</u></b></p> <p>Event Image Event Name Days Left for Event No. of People Interested Mark as Fav. (View No. of Fav.) Bar Name Date of Event</p>
--	--	---

	<p>not be based on closing but based on distance from the bar. Sometimes the closing time of bars inaccurate.</p> <p>Flexsin: Yes, the check-out will be based on the distance from the bar (200 ft). when any user is 200 ft. away from the bar, they will be check-out automatically.</p> <p>Users will be able to search for any bar and will be able to check-in into the Bar.</p> <p>We can have a default of 7am as a check out because some bars may not have a closing time</p> <p>Flexsin: Yes, there would be default check-out at 7 AM in case if user stays in the bar or his/her internet is not working properly.</p> <p>At that point of time, system will check the following things: Opening Hours of Bar Approximate Distance from User to Bar Location.</p> <p>Pls do not include the opening time as a requirement because the opening time may be inaccurate. Let us keep the gps location be the main requirement</p> <p>Flexsin: Ok we will keep the gps location as the main requirement for the opening time.</p> <p>If the above mentioned case will match then only user will only be able to check-in into the Bar.</p>	<p><b><u>Promotion 2   View All – Direct to Promotion/Event Page</u></b></p>
2.	<p><b><u>Event   Promotion</u></b></p> <p>Please note the files uploaded relating to the events an</p>	<p><b><u>Take Action:</u></b></p> <p>Users will be able to take action to show their interest whether coming or</p>

	<p>promotions should be on display on the promotions page.</p> <p>Flexsin: Which files are you talking about? Is it about the flyers? Please confirm</p> <p><b>CESAR:</b> The below pics are an example of what a bar owner may post on the promotions page and it should be the pic that shows on the promo page. A template should be optional.</p> <p>The image size could be different and when the user clicks on the promotion, the information page about the event comes up but it should also take the user to the bar profile page. Also these bar promotions should also be visible in the bar profile page</p> <p>For example a bar has a Christmas promotions showing in the promotions page. If a user clicks on that bar profile of the bar, the same promotions can be found in the bar profile promotions section. Also there needs to be a link from the promotion page Christmas promotion to goto to the bar profile page (Attached referred images in screen shot section.)</p> <p>Event Name Days Left for Event -Based on the Event Date and Current Date Mark as Fav. (View No. of Fav.)</p>	<p>not.</p> <p>Yes (Click on Yes to show interest and view no. of People say YES)</p> <p>May Be (Click on May Be to show interest and view no. of People say MAYBE)</p> <p>No (Click on No to show interest and view no. of People say NO)</p> <p><b>Event Manager</b> <b>Information:</b> Users will be able to view the information about the Event Manager and have an option to contact him/her. View Event Manager Name View Phone Number Contact Event Manager: When a user clicks on Contact, Native Email app of phone will be opened.</p>
--	--	--

	<p>Event Images – Swipe Left   Right to view more images</p> <p>Bar Name</p> <p>Date of Event</p> <p><b><u>Take Action</u></b></p> <p>View Event Timings</p> <p>View Event Location</p> <p><del>Max. 	<p>3. <b><u>SPY Questions:</u></b></p> <p>Please note the comment i made on incentives for spy questions</p> <p>Flexsin: Okay this would be a part of subscription plan for bar owner.</p> <p>Users will get the SPY question as a pop-up to answer it.</p> <p>SPY Questions will be defined by the Bar Owners.</p> <p>View Bar Name</p> <p>View Date of Checked-In</p> <p>View SPY Question</p> <p>Enter Answer</p> <p>Next</p>	<p><b><u>All the SPY questions will be selected by the Bar Owners.</u></b></p> <p>SPY Questions will be sending it to the user after a day of check-In or when a Bar Owner broadcast the message to the users from the dashboard.</p>
Alternate Flow:	Users will be able to view the member information from the Meet section and view the Bar information from the listings.	
Post Condition:	When a user view the Bar information, users will be able to view the Event   Promotion Page   Member Checked-In	

Screenshot:

Sample Image (a)Sample Image (b)

Comments:

**SPY Questions** will be pop-up to the users after checked-in users.

Pop up should be the day after the person visited the bar. There should be a default questionnaire for the spy questions. By default, all registered bars should have this benefit, however after receiving 10 spy questions answered, a pop up should show that in order to receive more, the bar owner has to pay for a paid subscription

Flexsin: Yes, we do agree the above information, while for the default

questionnaire for the spy questions templates will be provided by you.

### 3.12. Meet Screen (UC\_MAB\_GN\_12):

Use Case Name:	Meet Screen		
Actor:	Registered Users		
Purpose:	This functionality will be developed to provide the facility to the users to browse the nearby Bar Hoppers based on the GPS location.		
Description:	<p>Users will be able to view the list of profile based on the GPS location and the following parameters:</p> <ul style="list-style-type: none"> <li>Who has most no. of Favorites/Popularity</li> <li>Who has most no. of Gifts</li> <li>Who has most no. of Invites</li> </ul>		
Normal Flow:	S.No	Requirement	Comments
	1.	<p><b><u>My Friends (Toggle Button):</u></b>  <b><u>When Disabled:</u></b> Users will be able to view the list of profiles based on the GPS location.</p> <p><b><u>When Enabled:</u></b> Users will be able to view the list of their friends and the invites for drink sent/received.</p> <p><b><u>My Friends</u></b>  <b><u>Invite for Drink Sent</u></b>  <b><u>Invite for Drink Received</u></b></p> <p><b><u>Meet Screen:</u></b>          Users will be able to view the list of profiles based on the GPS location and other parameters.</p> <p><b><u>User 1:</u></b>          User Name (Not Full Name)          User Profile Picture          User Age          Distance Away          Online Status          Click on Picture to view details</p> <p><b><u>User 2 / 3..so on.</u></b>  <b><u>NOTE: If user haven't enabled the location then user will be</u></b></p>	<p><b><u>My Friends:</u></b>          Users will be able to add the users in friend list from the message or user profile screen.</p> <p><b>When a user wants to make another user a friend, how does the user send a friend request?</b>          Flexsin: It is already mentioned that there will be an option on the user user's profile or on the message screen to send the friend request.</p> <p><b><u>Invites Received:</u></b>          When a user received any invite then a user will be able to accept or reject the invite from this section.</p> <p>Once a user accepts the invite then Invite Icon will be highlighted.          If a user rejects the invite then it will be removed from the list.</p> <p><b>Invite Sent:</b> Users will be able to view the status of</p>

	<p><u><b>able to select the location from filter option.</b></u></p> <p><u><b>Filter Option:</b></u>          There is a filter option on Meet screen as well to filter the listing of the users.          Select Location          Select City   State          OR          Select Distance Radius  <b>NOTE:</b> Users will have an option to select the location or search the user by distance.          Both the options are great but pls find a way so that the user can choose which way to search and not to show both search options at the same time. I think this is confusing and users will end up filling out all parameters and will cause an error          Flexsin: Please let us know which option you would like to prefer, as we can have both the options and it is up to the user to select the option they would like to go with.          The user can choose one of the two options provided.          The two options should be provided          Flexsin: Okay</p> <p><u><b>Purpose</b></u></p> <p>Please improve this purpose filter. Think it is best to filter for people looking for new relationships and what type of relationship and what special relationship they are looking for. This is the heart of the MEET page and is needed. No one will care about barhoppers looking for nearby</p>	<p>the invite whether the invite has been accepted or not.          If accepted: Icon will be highlighted.</p>
--	--	--

	<p>bars or looking for events, etc. The main filtered here is what type of relationships other barhoppers are poking for and we need to improve this part to make it clear and easy to filtered what the users are looking for. In fact we need to put this at the very top under the distance</p> <p>Flexsin: Okay, we do understand your point.</p> <p>If there is any sub-purpose of any particular purpose then user will be able to select as well.</p> <p>We need to show a city and state in the barhopper profile page. We need this information for the filtering process. I do not see anywhere where we asked the city and state of the user</p> <p>Flexsin: We have added this "CITY and STATE" in <b>User Profile Information (UC_MAB_GN_13)</b> section.</p> <p><u>Income</u> Users will be able to select the Income Range</p> <p><u>Age Range</u> Users will be able to select the Age Range</p> <p><u>Marital Status</u> Users will be able to select whether he is looking for married   single   divorce</p> <p><u>No. of Children</u> <u>Height In ft/inches</u> (This would be in 10 cm Range) like 120-130 cm</p> <p>Pls use feet. Inches and miles for distance</p> <p>Flexsin: Yes, we will use ft/inches for height and miles for distance.</p>	
--	--	--

	<p> <u>Body Type</u>  <u>Hair Color</u>  <u>Religion</u>  <u>Education Level</u>  <u>Profession</u>  <u>Drink Alcohol? – Yes   No  </u>  <u>Sometime</u>  <u>Smoke? – Yes   No  </u>  <u>Sometime</u>  <u>Ethnicity</u>  <b><u>Apply / Reset</u></b>  VIP members will have more filter options than the basic profile. Vip members will be able to filter answers to the personal questions  Flexsin: Please let us know about the more filter options for the VIP members.  <b><u>My Friends</u></b>   <b><u>User 1:</u></b>  User Name  User Profile Picture  User Age  Distance Away  Online Status  Click on Picture to view details  <b><u>User 2 / 3..so on.</u></b>   <b><u>Invites for Drink Sent</u></b>  <b><u>User 1:</u></b>  User Name  User Profile Picture  User Age  Distance Away  Online Status  Status of Accepting the Invite:  When a user accepts the invite then mark of accepting the invite will be highlighted.  Click on Picture to view details  <b><u>User 2 / 3..so on.</u></b>   <b><u>Invites for Drink Received</u></b>  <b><u>User 1:</u></b> </p>	
--	---	--

	User Name User Profile Picture User Age Distance Away Online Status Accept   Reject Status of Accepting the Invite: When a user accepts the invite then mark of accepting the invite will be highlighted. Click on Picture to view details <u><b>User 2 / 3..so on.</b></u>	
Alternate Flow:	Users will be able to Invites for Drinks for Sent   Received   Friends from the More section as well.	
Post Condition:	Users will be able to view the detail information about the Bar Hopper.	
Screenshot:	 <p>The screenshot shows a mobile application interface titled 'Meet'. It features a grid of user profile cards. Each card displays a circular profile picture, the user's name, age, and distance away (e.g., '23 km away'). The profiles are arranged in two columns. At the top, there are tabs for 'My Friends' (with a 'Yes' indicator) and 'Meet'. Below the grid, there are more tabs: 'My Friends', 'Invite for Drinks Sent', and 'Invite for Drinks Received'. A large blue watermark 'Flexsin' is visible across the image.</p>	
Comments:		

### 3.13. User Profile Information (UC\_MAB\_GN\_13):

Use Case Name:	Meet Screen
Actor:	Registered Users
Purpose:	This functionality will be developed to provide the facility to the users to browse the nearby Bar Hoppers based on the GPS location and other parameters.

Description:	Users will be able to view the profile information when a user clicks on any profile.		
Normal Flow:	S.No	Requirement	Comments
	1.	<p>Users will be able to Swipe Left to see more profiles or Swipe Right to see previous profile.</p> <p>Tag line should be left for the users to create with a limit on the # of characters</p> <p>Flexsin: There would be a limit for 30 characters for tagline.</p> <p><b><u>Meet Detail Screen:</u></b>            User Name            User Age            User 10 Sec Video            Audio Mute Option            Distance Away            Online Status            City            State</p> <p><b><u>More Option:</u></b>  <u>Report User</u>  <u>Block User</u>  <u>Add as Friend</u>            Add as a friend requires an acceptance by the other. The add as a friend need to be more visible</p> <p>Flexsin: As per the latest design, there will be an option to send request in More section.</p> <p>Mark as Favorite – User will get the notification when someone has favorite the user.</p> <p>Click on <b><u>Camera Icon</u></b> to view Another Photos. When a user clicks on Camera Icon again then video will be displayed to the user.</p> <p>View User's Photos – View No. of Photos</p> <p>View Verification Status</p>	<p><b><u>Tag Line:</u></b> Users will be able to select the pre-defined tag line while creating the profile.</p> <p><b><u>Camera Icon:</u></b> When a user clicks on camera icon then a video section will be flipped and list of photos will be displayed to the user.</p> <p><b><u>Report User:</u></b> Users will have an option to report the user from the application. When any user reports to user then a notification will be sent to admin with a reason Client has selected. Admin will be able to take an appropriate action. Select Reason   Enter Own Reason Submit</p> <p><b><u>Block User:</u></b> Users will be able to block the user from the application and then user will not be able to receive any message from the user.</p> <p><b><u>Add as a Friend:</u></b> Users will be able to add as a friend and the user will display over My Friend list. NOTE: User will get the notification when someone has added him in friend list.</p> <p><b><u>Private Photos:</u></b></p>

	<p>Facebook Verified   Email Verified   Phone Number Verified</p> <p>View Tag Line</p> <p>View Bar Name (Checked-In)</p> <p>Bar Location</p> <p>Bar Icon</p> <p><b><u>Further Details:</u></b></p> <p>About Bar Hopper</p> <ul style="list-style-type: none"> <li>• Date of Birth (Calculate Age)</li> <li>• Height</li> <li>• Gender</li> <li>• Marital Status</li> <li>• Body Type</li> <li>• Hair Color</li> <li>• Ethnicity</li> <li>• Religion</li> <li>• Education Level</li> <li>• Profession</li> <li>• No. of Children</li> <li>• Drink Alcohol</li> <li>• Smoke</li> <li>• Purpose</li> </ul> <p>If there is any purpose of any particular purpose then sub-purpose will not be displayed to any user due to privacy until user allow from the Privacy section.</p> <p>Also, if there are multiple purposes then user will be able to view the purposes over the section.</p> <p>Pls don't forget we have to ask about their city and state</p> <p>Flexsin: Yes, we have already included that in the above section.</p>	<p>NOTE: If Photos are private, user would have to send the request to the user to see the private photos.</p> <p><b><i>Send Request</i></b></p> <p>Another user will get the request and then user will have an option to accept   ignore the request to give the access for the photos. When a user gives the access for the photos, it means it also allow the user to see private questions as well.</p> <p>Users should be able to have some photos not private and some private</p> <p>Flexsin: Yes, users will be able to have some photos as "Private" and some photos as "Public". Actually it depends on the user, they can also make all the photos private or public according to their wish.</p> <p>We have designed in such a way where user can make photos private by clicking on photos option.</p> <p><b>View More Info:</b> When a user clicks on View More Info, users will be able to view the list of the questions answered by the user. Users will be able to compare their own answer with the user.</p> <p>System will smart enough to know which question has the same answer and which is not.</p> <p>There will be two scenario for list of questions:</p> <p><b><i>If user (who viewing the</i></b></p>
--	--	---

		<p><b><u>profile) haven't answer of any question:</u></b> In this case, user would have to answer the question to see what answer of the user.</p> <p>When a user submits their own answer, then system will save the answer into their own profile.</p> <p><b><u>Compare Question:</u></b> When a user enters the answer to see answer of user's then system will know whether the answer is matched or not.</p> <p><b><u>If user made the question private:</u></b> It depends upon the user whether he wants to make the answer of any question private   public while answering the question (create profile section). Public answer will be visible to the user. For private answer, users would have to send the request to the user to see the answer. When a user accepts the request then only request's user will be able to see the answer of the question and compare. Also, when user accepts the request then it allow the requester to see the private photos as well.</p> <p>With regards to private questions, when the user grants access to a private question. Is this access only for that particular question or is it for all the private information. How</p>
---	--	---

			<p>long does access to the private questions lasts</p> <p>Flexsin: The access will be for all the private information, and there will be no time limit access to the private information.</p> <p><b><u>Give Gift:</u></b></p> <p><b><u>User would have to purchase the membership plan to send the gift to the user.</u></b></p> <p>Users will be able to send the gift to any user.</p> <p><u>View List of Gift:</u></p> <p>Gift Icon</p> <p>Please send the new icons for gifts as discussed with gorav</p> <p>Flexsin: Do you have any reference for the gift so that we can design it accordingly</p> <p><b>CESAR:</b> I would like the virtual gifts be a coffee "let us talk over coffee, beer "let's hang out", cocktail "I would like to get to know you", a rose "A rose to brighten your day", a kissing lip" You are so adorable", a teddy bear "I hope you give me a chance to know you", box of chocolates " I want to be friends with you, A dozen roses " I am thinking about you. , Smiley face "have a nice day" A ring , You are the one for me. I also wanted to add a gift of beads " let us party"</p>
--	--	--	---

			<p>Gift Name Select Gift Send Message along with Gift</p> <p><b><u>Send Gift</u></b></p> <p><b><u>NOTE:</u></b> Gifts will not be displayed to any viewer. Only user who has got the gift will be able to view the no. of gift received.</p> <p>This point system can be applied towards the spy questions</p> <p>Flexsin: No, the points system is not for the spy questions, it will be only for the Gifts option.</p> <p>WHat is the incentive for people to fill out spy questions from bars?</p> <p>Flexsin: There is no incentive for people from bars.</p> <p><b>CESAR:</b> Users will be able to get the incentive of virtual gifts, they'll be eligible to get this incentive only if they have submitted 60% of total spy questions. For e.g.- if there will be 10 spy questions, then a message will be displayed to the users that you need to complete 6 questions out of 10 to get the incentives i.e. 1 virtual gifts and 2 invites.</p> <p><b>FLEXSIN:</b> okay</p> <p>Gifts points can be redeemed while</p>
--	--	--	---

		<p>purchasing the membership plan. Min. no. of gifts should be 20 to be redeemed. If any user has got 10 roses then \$2 can be redeemed for those gifts.</p> <p>Please explain this \$2</p> <p>Flexsin: \$2 is just an example only there will be certain amount which will be redeemed.</p> <p><b>Chat:</b> If any user wants to send message or communicate with the user then users will be able to click on Chat button to direct to the Message screen and start chatting with the user.</p> <p>When user is a first time sending a message to the user, then there will be some limitation to send the message to a particular user per day. User will have 10 messages per day to send messages to the user. Whether user can send 10 messages to a one user or send 1 message to 10 users per day. Once a user replies to the message of the sender then both will be able to communicate each other. If a user has purchased the membership plan, they user will be able to send the unlimited message to the user.</p> <p>There is a security mechanism in place here to avoid members from bothering uninterested</p>
--	--	--

		<p>users. If a user has sent more than 10 messages then both parties have to agree on becoming friends to be able to continue messaging. As it is stated here, when someone send a message to another user, the recipient needs to respond in order to initiate a conversation. If the recipient does not respond then the sender should not be able to send another message to the recipient. I like this method to limit unwanted messages from unwanted users.</p> <p>Flexsin: If user has sent 10 or more than 10 messages they cannot become friends. For becoming friends it is mandatory to add users as friend by clicking on "ADD as Friend" on their profile.</p> <p>What about the mentioned security measure to avoid many unwanted messages?</p> <p>Flexsin: We will show a pop up to users after 10 messages that you want to become friends or not.</p> <p><b><u>Let's Drink:</u></b></p> <p>Users will have an option to send the invite for drink to any user and the recipient user will be able to view the list of the users who wants to have a drink with him/her.</p> <p>Recipient user will get the notification when someone sent the invite for drink.</p>
---	--	--

		Recipient user will have an option to accept   reject the request for the invite.
2.	<p><b><u>View More Info</u></b></p> <p>When a user clicks on View More Info then users will be able to view the list of the questions along with the answers submitted by the user.</p> <p>If any private answer of question, users would have to send request to see.</p> <p>When sending a request then a pop-up will be displayed. In pop-up, user photo should be fetched.</p> <p>If answer is public but cannot see answer, user would have to enter his own answer to see and match the answer.</p> <p>View Answers (With Three Tab)</p> <p>All Questions</p> <p>Same Answer Question</p> <p>Diff. Answer Question</p> <p>In All Question Tab:</p> <p><u>Question 1</u></p> <p>View User's Answer</p> <p>View Your Answer (If already given)</p> <p>See Status: Same or Different</p> <p>Same: Green Line</p> <p>Different: Red Line</p> <p>If user has not their own answer then user would have to submit his own answer to see.</p> <p>Answer to See Her/his Vote</p> <p>View Question</p> <p>View Option to Answer</p> <p>If user select same answer</p>	<p>With regards to private information and request to view the information, for example some sends a request to see the private information about a certain question. A request will be sent to user and it may take time before the user grants permission to the request. how is the requester going to know that he/she has been granted access to the private information and does this access allow the user to see all private information about this user</p> <p>Flexsin: User will receive the notification regarding the approval to see all the private information.</p>

		then Matched Icon will be displayed If user selects different answer then Different Icon will be displayed.	
	3.	<u><b>Give Gift</b></u> <u><b>Chat</b></u> <u><b>Let's Drink</b></u>	
Alternate Flow:	Users will be able to chat with the user from Chat Section.		
Post Condition:	Users will be able to communicate with the user or back to see the more profile.

### 3.15. Chat Screen (UC\_MAB\_GN\_15):

Use Case Name:	Chat Screen
Actor:	Registered Users
Purpose:	<p>Users will be able to view the Chat screen when a user clicks on Chat section from the bottom. The purpose is to provide a section where a user can see the communication among the users.</p> <p>Users will be able to communicated into the Bar chat after the checked-in onto the same Bar. Only VIP member will only be able to enter into the Bar chat without check-in.</p>
Description:	<p>Users will be able to view the chats with the users and start the communication with the user.</p> <p><b>Chat feature: Only users who are checked in the bar are able to join the chat. When the user leaved the bar, the user will be disconnected from the chat but will be able to keep the chat history for at least a week.</b></p> <p>Flexsin: Ok we will consider this, but we would recommend that user should continue conversation in the group for atleast a week.</p>

Flexsin: We have already mentioned in the document.

Normal Flow:

S.No	Requirement	Comments
1.	<p><b><u>Chat Screen</u></b></p> <p><b>Bar Chat   Messages (Two Tab)</b> Users will be able to view the Bars on which they have checked-In now or previously.</p> <p>Users will have an option to start the Bar chat and communicate with the group user within the app.</p> <p><b><u>Bar Listings:</u></b> Bar 1 Bar Name Bar Image How Many Members have Joined that Group <b><u>Start Bar Chat Button</u></b> <b><u>Users will be able to view the list of Bar Groups created previously.</u></b> When a user clicks on Start Bar Chat then user will direct to chat page and communicate with the users in a group. If a user already joined in Bar, users will be able to view the no. of unread messages for a particular Group.</p> <p><b><u>More Option</u></b> New Message Search Users New Bar Group - Search Bar Group Message Setting</p>	<p>For Group Chat and One-to-One Chat, we will be using the Twilio API and Client will purchase the API when our developer team asks the details.</p> <p>Send Emoji: Client will purchase the pack of the Emoji and we will use the same for the chatting.</p> <p><b><u>Bar Chat:</u></b> Scenario to Enter into the Bar Chat: <b><u>If Checked-In:</u></b> Users will be able to enter into the Bar chat only when user has checked-in into the Bar. After checked-out, users will still be able to communicate in a Group Chat until a user leave the room. NOTE: Group Chat will be removed before 30 days. <b>If Checked-In on Another Bar:</b> If a user has checked-in on another Bar then another group will be created and user would have to enter into the Bar chat to chat with the other users.</p> <p><b><u>If Checked-In on Same Bar:</u></b> There should be one group chatting in each bar that users can start and let others join. There can not be multiple groups in one bar!</p> <p>Flexsin: okay. we understand it</p>

		<p>When a user checked-in again on same Bar then another group will be created.</p> <p>In that case, users will recognize the group name with Date and Bar Name. Bar Name Group with Date Bar Name Group 1 with Date Bar Name Group 2 with Date</p> <p><b><u>Case for VIP Members:</u></b> Users will be able to send the unlimited message of user is VIP member.</p> <p>In Group Chat, a labeled will be displayed with a VIP if any paid member entered into the Bar chat.</p>
2.	<p>Bar Chat   <b>Messages</b> (Two Tab)</p> <p>When a user goes to the message section, users will be able to view the list of the users to whom, user communicating with. User 1   user 2 User Name User Profile Picture Time   Date of Message Sent   Received View No. of Unread Message Click to go to Chat Screen</p> <p><b><u>More Options (3 Dots at the Top):</u></b> Search Users -Search by User Name Favorite Users – Direct to Favorite screen Unread Messages – Only Unread messages will be displayed</p>	<p>For the first time user, users will be able to send limited messages to the user.</p> <p>Free user will only get 10 messages per day. Whether user can use 10 messages to one user or user for several users.</p>

		Message Settings – Direct to Message Setting Screen	
	3.	<p><b><u>Chat Detail Screen</u></b></p> <p>When a user clicks on any user to view the conversation, users will be able to view previous message and send any message to the user.</p> <p>User Name</p> <p>At any time a user clicks on the picture profile of a user, this should direct the screen to the barhopper profile. In this case, there should be a way to go back to previous screen</p> <p>Previous Messages</p> <p>Flexsin: Yes, clicking on profile of user would direct user to other users profile from where they can review the information. Yes, there would be a back button to go to the previous message scree.</p> <p>Date of Received Message</p> <p>Tap on any message to Copy   Delete   Forward</p> <p>Text Message Field</p> <p>Send Message Button</p> <p>Send Photo   Video</p> <p>Send Gift</p> <p>Send Emoji</p> <p>More Option on Chat Detail Screen:</p> <p>Search Message</p> <p>Block User</p> <p>Report User</p> <p>Clear Chat</p> <p>View User Information</p>	
Alternate Flow:	<p>Users will be able to start communicate from the user's detailed screen.</p> <p>Users will be able to start Bar chat from the bar detail screen.</p>		
Post Condition:	Users will be able to see the other user listings to start chat or access another options.

#### 4.2. Login (UC\_MAB\_WD\_02):

Use Case Name:	Login		
Actor:	Visitors		
Purpose:	From this page, users will be able to login into the website.		
Description:	Users will be able to login into the website by using the login credentials.		
Normal Flow:	S.No.	Requirement	Comments
	1.	User must have to login to the website first in order to access the dashboard. If a user is not	

		registered, he needs to sign up to enjoy the services of this dashboard.	
	2.	<p>Logging in or on and signing in or on is the process by which individual access to a system is controlled by identifying and authenticating the user through the credentials presented by the user.</p> <p>Once a user has logged in, they can then log out or log off when access is no longer needed.</p>	<p>We need to have an email authentication and cell phone authentication for the registration of a bar owner. They also need to be required to enter the business phone number. We also need a check for terms and conditions and privacy policy being checked</p> <p>Flexsin: We will provide both Email and Cell phone authentication but if the user will be verified by only one of them we will provide the login access to the user.</p> <p>Yes, they will be able to enter their Business Contact Number. Also there would be a check for terms and conditions and privacy policy being checked.</p>
	3.	<p>User will have the ability to make login by clicking on the Login button after providing the valid user id (i.e. email address) and password. Once user clicks on the Login button, system will validate the login credentials as provided by the user.</p> <p>On successful login user will be redirected to "daily updates page" in the dashboard.</p> <p>If user does not provide valid login credentials then</p>	<p>Based on the email address, users will direct to the respective dashboard.</p> <p>NOTE: If any user wants to sign-up as a two type of users then user would have to use the different email address for both type of actors.</p>

	<p>system/website will prompt a message "Please enter valid user id &amp; password".</p> <p>If the user doesn't enter any of the required credential (username or password) then system will prompt a message "Please enter username and password".</p> <p><b><u>Manual Login:</u></b>  Email Address  Password  Keep me Logged-In  Forgot Password?  Login Button  Don't have an account?  Signup</p>	
Alternate Flow:	If a user doesn't have the login credentials then users will be able to sign-up on the website.	
Screenshot:		
Comments:		

#### 4.3. Forgot Password (UC\_MAB\_WD\_03):

Use Case Name:	Forgot Password
Actor:	Visitors
Purpose:	From this page, users will be able to retrieve their password.
Description:	This use case describes the actions when Forgot Password button is

clicked on login page by the user.			
Normal Flow:	S.No.	Requirement	Comments
	1.	<p>User will be landing to this page when clicks on the "Forgot Password" button from Login page.</p> <p>Password recovery area will appear on this page. User have to enter the registered email address in order generate new password.</p> <p>As soon as the User clicks on the <b>"Reset my password" BUTTON</b>, the system will validate the entered email address.</p> <p>On successful validation, an automated password reset email will be sent to the entered email address and show a message <i>"If &lt;&lt;EMAIL_ADDRESS&gt;&gt; is registered with us then we'll send a reset password link on the same email address"</i></p>	
	2.	<p>Users will also be able to retrieve their password by using their registered mobile number.</p> <p>Enter Phone Number Enter OTP (Received on mobile number) Enter New Password Enter Confirm Password <b><u>Or Retrieve Password from Email Address:</u></b></p> <p>Email will contain a reset</p>	For Phone Number, we will integrate the Twillio API on the website.

	<p>password link (with encrypted data) which will direct the user to choose/Reset new password.</p> <p>If the validation is not successful, and show a message <i>"If &lt;&lt;EMAIL_ADDRESS&gt;&gt; is registered with us then we'll send a reset password link on the same email address"</i>.</p> <ul style="list-style-type: none"> <li>• <b>Forgot Password &gt; Request for New Password &gt; Click on the Link</b></li> </ul> <p>User enter their Registered Email ID and submit After Click on Request for New Password User get a reset Password Link on their Registered Email ID After go through this link They will have on Reset password Page</p>	
	<p>3. <b>Subject:</b> Reset your password</p> <p><b>From:</b> no-reply@yourdomain.com</p> <p><b>To:</b> &lt;SUBMITTED_EMAIL_ADDRESSES&gt;</p> <p><b>Email Content:</b></p> <p>Dear &lt;SCREEN_NAME / USERNAME&gt;,  You told us you forgot your password. If you really did,</p>	

	<p>click here to choose a new one:</p> <p><a href="#">Choose a new password</a></p> <p>Need the raw link?</p> <p><a href="https://www.yourdomain.com/rp/qbvlXPzjpugflZQTzxhv9uTb9evTqeYL">https://www.yourdomain.com/rp/qbvlXPzjpugflZQTzxhv9uTb9evTqeYL</a></p> <p>This link is valid only for 1 day.</p> <p>If you didn't mean to reset your password, then you can just ignore this email; your password will not change.</p> <p>Thanks &lt;WEBSITE_NAME&gt; Team</p>	
	<p>4. <b>Reset Password:</b></p> <p>User will be landing to this page when clicks on the "Choose a new password" link from Reset Password email.</p> <p>As soon as the "Choose a new password" page loads, the application will do the below listed checks and operations.</p> <p>Application will check if the "Choose a new password" link is valid or not.</p> <p>1. If URL is valid, then Application should display "Reset password" screen (form fields are New Password input box, Confirm New Password input box, Reset Password button) to the User User will enter new password in "New Password" input box,</p>	

		<p>“Confirm New Password” input box and click on “Reset Password” button.</p> <p>If the password entered in “New Password” input box, “Confirm New Password” input box are same then update the password and send an automated acknowledgement email to User on registered email address.</p> <p>If the password entered in “New Password” input box, “Confirm New Password” input box are mismatch then show error. “Your new password and Confirm new password do not match.”</p> <p>2. If URL is not valid then show error message “Invalid or Expired link, please click below to reset your password”. There will be a button underneath the message which will redirect the User to Forgot Password page.</p>	
	Alternate Flow:		
	Screenshot:		
	Comments:		

#### 4.4. Signup (UC\_MAB\_WD\_04):

Use Case Name:	Signup		
Actor:	Visitors		
Purpose:	From this page, users will be able to sign-up into the website.		
Description:	Users will be able to sign-up into the website by selecting the type of user.		
Normal Flow:			
	S.No.	Requirement	Comments
	1.	<p>Users will be able to sign-up into the website.</p> <p>For signup, users would require to select the type of user while signup.</p> <p>Select Type of User: Bar Hopper &amp; Event Organizer   Promoter</p> <p>When the user signs up on the web and is a barhopper, an email or SMS message to download the mobile app on the their phone should be sent.</p> <p>Before the app development is finished, we can already have this functionality active but instead of downloading the app, we show a message saying that you will be notified when the app download is ready. With this in mind, we need an ability to email or contact all the signed up users to be able to notify them at once</p> <p>Flexsin: Yes, we do understand</p> <p>When a user selects Bar</p>	<p>Bar Hopper will only be able to sign-up onto the website, bar hopper would have to download the iOS application to access the features of Meet At Bar.</p> <p><b>NOTE:</b> For Phone verification, we will be using the Twillio SMS API and Client will purchase the same.</p> <p><u><b>User Name:</b></u> When a user enters the username then system will check the availability of the username.</p> <p><u><b>For phone number:</b></u> User will get the OTP on their entered mobile number and user would have to enter the same to verify their mobile number.</p> <p>Based on the user type, users will direct to respective dashboard.</p>

	<p><b><u>Hopper:</u></b></p> <p><u>Enter Username</u> – Username validation should be implemented similar to mobile application.</p> <p><u>Enter Email Address</u> User will only be able to use one email address for one type of actor.</p> <p>Select Profile Picture</p> <p><b>Enter Phone Number – Phone number field will not be displayed to the Bar Hopper</b> as we should follow the same procedure as we have in the app.</p> <p>Create Password Confirm Password Agree with T&amp;C - Checkbox Submit</p> <p>Already have an account? <b><u>Click here</u></b></p>	
Alternate Flow:	Users will be able to login into the website if they have the login credentials.	
Screenshot:		
Comments:	<p>We need to look at the logic of asking a user to take a pic when they are using a laptop or desktop.. As for the event promoter and bar owner, we don't need their photos....</p>	

	Flexsin: They will only be able to upload the picture rather than taking it. Okay, we will remove the photo's option for bar owner and event promoter.
--	---

#### 4.5. Register Bar (UC\_MAB\_WD\_05):

Use Case Name:	Register Bar		
Actor:	Visitors		
Purpose:	From this page, user who wants to register their bar can fill the details.		
Description:	User will be able to register their bar by creating their account by filling the necessary information or fetch the information from the Google Places API.		
Normal Flow:	S.No.	Requirement	Comments
	1.	<p>User will be able to register their bar by clicking on Register Bar button.</p> <p>Step 1:  <u>Enter Bar Name</u>  <u>Enter Bar Location</u></p> <p>User need to enter the above details and click on the <u>Get Started</u> Button to find the list of the Bars fetch from Google Places API.</p> <p><b><u>Find and Claim Your Bar:</u></b>            There will be list of Bars displayed fetched from the Google Places API.            View how many no. of Results found in entered location.            Bar Listings:  <u>Bar 1</u>            Bar Name            Bar Image            Bar Location</p>	<p>User can search for his bar to register it, a list of bars will be provided which will show the status of the bar i.e. if the bar is already registered, register a bar if not registered and if the user don't find his bar in the list of bar then he can create a bar account to get his bar registered.</p> <p><b><u>Already Registered:</u></b>            User will get to know if the bar is already registered with Meet At Bar.</p> <p>In a case where the bar owner finds his or her bar already registered, there needs to be a way to challenge the registration of the</p>

	<p>Bar Description</p> <p>Register   Already Registered</p> <p><u>Bar 2   3..so on.</u></p> <p>Can't Find Your Bar? <b><u>Add Your Detail</u></b></p> <p>There will be pagination to view the next list of Bars.</p>	<p>registered bar OR in a situation when there is a change in manager or even owner and the registration needs to be changed. Next to the bar name that says REGISTERED should have an option of CHANGE REGISTRATION.</p> <p>Flexsin: there needs to be a process to reclaim it like how we will identify it online.</p> <p><b>Register:</b> User would register the bar if he finds his bar in the list of bars by filling the following details. By registering the Bar, user will fetch the info from Google Places and add other information related to Bar.</p> <p><b>Add your Bar Details:</b> If the user will be unable to find his bar in the list of bars, then he need to create a bar account where he will be getting the bar code through which he would get his bar registered.</p> <p>The bar code will be send to the mobile number or the email address he have mentioned ,user need to enter that bar code to get registered.</p> <p>We need to state that</p>
--	--	---

			<p>the telephone number they enter should be a mobile number that can receive text. We also need to get the phone number of the business separate from the cell phone number.</p> <p>Flexsin: Yes, we will display this information to the bar owners when they are setting up their profile. Also we already have an option for them to provide both the contact numbers i.e. Bar's Phone and Contact Person's phone.</p>
	2.	<p><b>Already Registered:</b> If any particular bar is already registered then user will be able to view the status whether the bar is registered or available to register.</p> <p>Please see note above regarding a case when a bar is registered by an unauthorized person. When someone makes this claim of unauthorized registration we need to be notified in the SUPERADMIN regarding this issue so we can investigate</p> <p>Flexsin: how we will come to know that this bar owner is an unauthorized user.</p> <p><b>Cesar:</b> If a user claims for any bar which is already registered, then a notification would be sent to the admin who will do the investigation of the bar claimed. Once the investigation gets over and admin finds that the claim is genuine, then</p>	

		<p>he/she can update the details of the bar and that will be displayed in the list over app.</p> <p><b>Flexsin:</b> Okay</p> <p><b>Register:</b> Users would be able to register their bar by clicking on Bar option and the information will be fetched from Google Places API and Bar Owner will be able to update information related to Bar.</p> <p><b>Bar Details :</b> User need to give the following bar details :</p> <p><b>NOTE: Information will be auto-populated from Google Places API and user will enter the details manually.</b></p>	
	3.	<p><b><u>UPDATE YOUR BAR DETAILS:</u></b></p> <p><b>NOTE:</b> If any information not getting from Google Places the user will have an option to enter it manually.</p> <p><u>Bar Name (Mandatory)</u></p> <p><u>Bar's Phone (Mandatory)</u></p> <p><u>Bar Tagline:</u> User need to give the tagline for their bar.</p> <p><u>Contact Person:</u> (Mandatory) It Contains the name of the person who could be contacted regarding the bar information, say the bar owner.</p> <p><u>Contact Phone</u></p> <p><u>Business Logo/Icon:</u> User have an option to upload a logo for their bar.</p> <p><b><u>Size should be:</u></b></p> <p>Not more than 1 MB</p> <p>Format: JPEG, PNG</p>	

	<p><u>Bar Picture</u>: User have an option to upload a bar picture. Size should be: Not more than 1 MB Format: JPEG, PNG NOTE: Bar Owners will be able to upload more than 1 picture. Max. Up to 5.</p> <p>The logo pic should be uploaded and labeled as logo pic and the rest of the pic should show in this page as an actual pic and not just a file name</p> <p>Flexsin: Okay, we do understand your point.</p> <p><b>Address</b>: User needs to give the Complete address of the bar. <u>Address 1</u> (Mandatory) <u>Address 2</u> <u>State</u> (Mandatory) <u>City</u> (Mandatory) <u>ZIP code</u> (Mandatory) <u>Map</u></p> <p><b>NOTE</b>: When a user enters the address then based on the location, PIN will be displayed over the Google Maps. We will integrate the Google Maps API onto the website. Bar Owners will be able to move the PIN on the Google Map and place on the exact location. Based on the PIN, exact address will be displayed to the user.</p> <p><b>Optional Hours</b>: User would have an option to give the bar operational hours in this.</p> <p>Leave this operational hours non</p>	
--	---	--

	<p>functional unless the bar is registered. Operational hours are often not accurate on google aPI</p> <p>Flexsin: Okay</p> <p><b>Check-Box:</b> User can select the same operational hours for all days by simply clicking on the check box.</p> <p>User can also enter the operational hours according to the respective days i.e. Monday to Sunday accordingly.</p> <p>Monday: Select Opening Time and Closed Time</p> <p>Tuesday: Select Opening Time and Closed Time.. And so on.</p> <p>Entrance Fee or Cover Charge? YES or NO SOMETIMES</p> <p>Please add a description box to explain entrance fee</p> <p>Flexsin: Sure we will include this.</p> <p>Do you allow smoking? Yes or NO</p> <p>Do you allow Cigars? YES or NO</p> <p>Do you allow under 21 yr olds? Yes No sometimes</p> <p>Flexsin: We will include this as well.</p> <p><b>CESAR:</b> Do you allow smoking? Yes or NO</p> <p>Do you allow Cigars? YES or NO</p> <p>Do you allow under 21 yr. olds? Yes No sometimes.</p> <p><b>FLEXSIN:</b> We will include this as well.</p> <p>Pls Have a description box to explain policy of under 21 yr old</p> <p>Flexsin: Okay</p> <p>Flexsin: okay we will have</p>	
--	---	--

	<p>I know that this is under facilities but this is vital information that should be on display on bar profile page</p> <p><b>Bar Specialty:</b> User will be able to enter the following information:</p> <p><del>Cuisine: Enter the cuisine which your bar is famous for, like Thai, Italian, Chinese, etc.</del></p> <p>Instead of bar specialty relating to food this is where we can have the type of bar for example (Users should be able to filter it based on these types)</p> <p>Sports bar Dance club/bar Music Venue Neighborhood bar Country bar Dive Bar College bar Cocktail bar Microbrewery Pub Lounge bar Wine bar Cigar bar Marijuana bar Strip club Cabaret Fern /Yuppie bar Music bar Non-alcoholic bar Beer bar Comedy bar Blues bars Karaoke bar Salsa bar Drag bars Topless bars Nightclub Biker bars College bars Gay bar Lesbian bar Mixed Straight/LGBT bars</p>	
--	---	--

	<p>Biker bars Casino bar</p> <p>Not all bars offer food so we need to remove the cuisine</p> <p>Flexsin: Ok, we will remove this.</p> <p><u>Capacity</u>: It will include bar capacity – Select Range</p> <p>HIDE</p> <p>With regards to bar capacity provide an option to the user to HIDE</p> <p>Flexsin: Okay, we believe that bar owner will be able to hide their selected range of capacity.</p> <p><u>Live Music</u>: Select yes or no through slide button if bar facilitates Live music, a description box is provided to enter the description for music.</p> <p>Is this box going to allow the user to write out the description and if yes then is this description going to show on the mobile app</p> <p>Flexsin: yes,</p> <p><u>Drink Special and Meet at Bar</u></p> <p><u>Special</u>: Select yes or no through slide button if bar facilitates Drink Special and Meet at bar, a description box is provided to enter the description for drink special and meet at bar.</p> <p>If the box will allow the user to describe the drink special with their own words then we also have to show this on the mobile app under the drink specials</p> <p>This drink special is for members of meet at bars only</p> <p>Flexsin: Yes, it would only be for the members of "Meet At Bar" only. If any respective bar is offering this feature then users</p>	
--	---	--

		<p>will visit the bar and will display the app to the server or the bar tender to avail this offer.</p> <p><u>Update:</u> The above information entered will be updated and user will be redirected to the dashboard.</p> <p><u>Cancel:</u> Clicking on cancel button will redirect you to the List of bars Page.</p> <p>NOTE: A pop-up will be displayed to the users to confirm if a user wants to cancel.</p>	
	4.	<p><b>Add your Bar Details :</b> If any user unable to find the bar in the list of bar page then user can create a bar account by entering the following detail :</p> <p>Enter email address</p> <p>I agree with terms and conditions (Checkbox)</p> <p><u>Already have a Bar User Account?</u></p> <p><u>Sign in to Register-</u></p> <p><u>Continue:</u> After clicking on the continue button user will be redirected to another page for filling more details.</p> <p>Email: User can add the email address.</p> <p>Enter Phone Number – Landline or Phone Number – System will get to know whether the no. of mobile number or Land line number</p> <p>First name   Bar Name</p>	<p>Users will not be able to access the dashboard until user verified the email address and phone number.</p> <p>I agree the user will not have access to the dashboard unless verified by email and cell phone number. This verification should also be done before displaying the updated information on the mobile app. Furthermore we need to indicate that this is a temporary approval until the business tel. # (the actual land line for the bar) is called by OTP and verified. So we need to have a way to track this in super admin for which bar registrations have temporary approval</p>

	<p>Last name</p> <p>Enter Password</p> <p>Password: User would have the option to show or hide the password while entering it.</p> <p>Confirm Password</p> <p>Continue: By clicking on it, user will be redirected to another page, where he would get three options of how a bar owners want to get verified?</p> <ul style="list-style-type: none"><li>• Call me at phone number</li><li>• Text me at</li></ul> <p>User can choose any of the verification mode, after choosing bar will be able to enter the code provided to him and click on continue button.</p> <p>Or Resend Code</p> <p>Clicking on continue button will redirect the user to the dashboard.</p> <p>Once a user verifies the phone number then a page will be displayed to verify the email address.</p> <p>NOTE: For verification, we will be Twlilo SMS API.</p> <p>If there is mobile number then user will get OTP as a SMS.</p> <p>If there will be any landline number then user will get a call for OTP.</p>	<p>and which one is approved.</p> <p>Flexsin: Okay we do understand your points and will have an option in admin's section for the bars status as "Temporary Approved" or "Approved"</p>

#### 4.7. Bar Profile (UC\_MAB\_WD\_07):

Use Case Name:	Bar Profile		
Actor:	Registered bar Owner		
Purpose:	From this section, users will be able to manage their profile.		
Description:	Bar Owners will be able to manage the profile section.		
Normal Flow:	S.No.	Requirement	Comments
	1.	<p>User can view and update his bar profile.</p> <p><b><u>Bar Profile Tab-</u></b></p> <p>Bar Owner will be able to view the following information:</p> <p>Bar Name</p> <p>Bar's Phone</p> <p>Bar Tagline</p> <p>Contact Person</p> <p>Contact Phone</p> <p>Business Logo</p> <p>Bar Picture (Upload more than 1 picture)</p> <p>Address: Users will be able to enter the address as well.</p> <p>Address 1</p> <p>Address 2</p> <p>State</p> <p>City</p> <p>ZIP code</p> <p>Map: User would be able to view the address he entered on the map and move the PIN on the Google Maps to set the</p>	

	<p>exact address. Based on the PIN location, address will be updated.</p> <p>Optional Hours: Bar Owners will enter the bar operational hours.</p> <p>User can select the same operational hours for all days by simply clicking on the check box.</p> <p>User can also enter the operational hours according to the respective days.</p> <p>NOTE: We have already detailed out this section above.</p> <p>Bar Specialty: User would mention the Specialty of their bar.</p> <p>We are focused on bars and not food so type of food is not necessary</p> <p>Flexsin: We have already considered this above as we have removed the cuisines from the Bar Specialty section</p> <p>Cuisine: <del>Enter the cuisine which your bar is famous for, like Thai, Italian, Chinese, etc.</del></p> <p>Capacity: It will include the Bar capacity – Select Range</p> <p>Hide Capacity</p> <p>Please have an option for the user to hide this if they do not want to show their capacity</p> <p>Flexsin: Okay we do note your point.</p> <p>Live Music: Select yes or no through slide button if bar</p>	
--	---	--

	<p>facilitates Live music, a description box is provided to enter the description for music.</p> <p>Drink Special and Meet at Bar Special: Enable   Disable</p> <p>Update: The above information entered will be updated and user will be redirected to the dashboard.</p> <p><b><u>Facilities:</u></b></p> <p>We need to have information on whether a bar charges entrance fee or not</p> <p>Flexsin: Ok, we will consider to provide information whether a bar charges entrance fee or not. And please provide all the facilities; we will not change it later.</p> <p>Developer Comments: There was no entrance fee field at the time of bar registration page. We need to add this field into the registration page.</p> <p>entrance fee is usually called cover charge</p> <p>Do you charge entrance fee/cover charge? Yes , No or sometimes</p> <p>Have a description box to explain this because bars sometimes will charge diff Ent amounts for different days</p> <p>Flexsin: Okay we got your point.</p>	
--	---	--

	<p>Also we have to ask Do you allow under 21 yr. olds? Yes or NO Or Sometimes Pls provide a description box to explain. Flexsin: we will consider this.</p> <p>This needs to be included in the bar registration and is very important to be displayed in the app. Flexsin: Sure, we will do so Bar owner can display and update the available facilities in the bar simply by sliding the yes / no button. Yes if the facility is available and no if the facility is not available.</p> <p>Live Entertainment (Yes/No) Discount for Members (Yes/No) Music (Yes/No) DJ (Yes/No) Food (Yes/No) Parking (Yes/No) Valet (Yes/No) Taxi (Yes/No) Entrance fee or cover charge? Yes or NO</p> <p>This needs to be added to filter results and displayed in bar profile page Flexsin: Okay</p> <p>Wi-Fi (Yes/No) 18 years old Allowed? (Yes/No) Smoking (Yes/No) Cigars (Yes/No) Hookah (Yes/No)</p>	
--	---	--

	<p>Dance Floor (Yes/No)</p> <p>LGBT</p> <p>Lifestyle (Yes/No)</p> <p>Please change Gay/alternate to LGBT which stand for lesbian gay bisexual transgender Flexsin: okay</p> <p>Swimming Pool (Yes/No)</p> <p>Billiards (Yes/No)</p> <p>Gambling (Yes/No)</p> <p>Slot Machines (Yes/No)</p> <p>Strip Clubs (Yes/No)</p> <p>Outdoor Seating (Yes/No)</p> <p>Add marijuana yes/no. Some states have legalized marijuana Flexsin: Okay</p> <p>Dress code yes/no Membership required yes/no Parking yes no Video games Other games Bowling Ping pong Sports Pay per view Flexsin: Okay, we will consider this</p> <p>Save: Click on save button to save the details or cancel the changes.</p> <p><b><u>Photos:</u></b></p> <p>Photos: Bar Owners will be</p>	
--	--	--

	<p>able to upload Bar photos from this section.</p> <p>View Uploaded Photos – When a user hover over the photo then an option to make the primary photo will be displayed to the user.</p> <p>Make Primary photo</p> <p>View Uploaded Video</p> <p>Photos and videos need to be taken from an iPhone so it's easy for bar.</p> <p>Flexsin: No, users will only have to upload the photos from the system.</p> <p>View Videos</p> <p>Select File from System to Upload Photo   Video</p> <p>NOTE: Size for the photo and video would be defined at the development phase.</p> <p>Photo should not be stretched.</p>

#### 4.10. SPY Questions & Feedback (UC\_MAB\_WD\_10):

Use Case Name:	SPY Questions and Feedback		
Actor:	Registered bar Owner		
Purpose:	The purpose is to select the SPY questions for the Bar hoppers.		
Description:	Bar Owners will be able to select the SPY questions and view the reports.		
Normal Flow:	S.No.	Requirement	Comments
	1.	<p><b><u>Spy Questions/Feedbacks</u></b></p> <p>User can create and broadcast spy questions and can give their feedback.</p> <p><u>SPY Questions</u></p>	

	<p>Create: User will be able to create spy questions.</p> <p>No of Questions Select: Bar Owners will be able to select the no. of questions selected.</p> <p><b><u>Master Collection</u></b></p> <p>User will be able to view the list of questions from which he will be able to select the questions to create spy questions, the list of questions is as follows :</p> <p>Text Box Questions.</p> <p>Paragraph Questions</p> <p>Radio Buttons Question:</p> <p>Check Box.</p> <p>Drop downs</p> <p>NOTE: There will be several categories for the question types and user will use the Check-box feature to select the questions.</p> <p>Spy questions need to be sent the next day after the check in. Also we need to make spy questions services for paid bar owner subscriptions. We also need to make this process of making the spy questions</p> <p>Flexsin: We have already included this, also the template of the spy questions will be provided by you.</p> <p><b><u>Broadcast:</u></b></p> <p>User can view the broadcast history.</p> <p>Bar Owner will be able to select the list of questions from the available SPY question. Along with that, bar</p>	
--	---	--

	<p>owner will have an option to select the no. of checked-in users.</p> <p>Select Users</p> <p>Select Any date – view No. of Checked-In user</p> <p>How does the bar select who to send the spy questions? Based on checked in days? # Of visits at the bar?</p> <p>Flexsin: There will be options in the dashboard itself, from where you can select whom to send the spy questions. They will be able to view the list of the users checked-in to the bar and can select any of them to send spy questions.</p> <p>The spy questions should provide incentives for the users otherwise not many will fill it out. For every spy question the user answers they will be able to get a credit for one virtual gift or drink invite credit. Therefore, gifts will not be unlimited in the premier/basic membership. A Premium member can send only 10 gifts per month and a VIP member can give unlimited amount of gifts. A free member will not have any gifts or drink invites to give to other members can give away gifts based on how much they earn on answering spy questions. This means that every user has to be able to track their number of gifts and drink invites available to</p>	
--	---	--

	<p>give to others. <b>ALSO we need to track the popularity of each members based on the area they are in comparing the number of gifts and Invites and favorites to other users in the area.</b></p> <p>Flexsin: For incentive of bar hoppers, we haven't discussed this before so we need to put efforts for the same.</p> <p>Filter Users: By Date Range View Total No. of Selected Checked-In Users <b>Broadcast Button</b></p> <p><b><u>Broadcast History:</u></b> Bar Owners will be able to view the broadcast history in this section. - Is online?
- Last Activity
- Profile Picture
- View User History
  - When User Signed Up
  - When became a Paid Subscriber
  - About Payments
  - About Check-ins
  - About Popularity
  - How long user checked in each bar

we need to know the history when the person signed up when converted to paid membership, payments, history of check ins, popularity, How long checked in each bar

Flexsin: We have mentioned these things above.

- User Photos: Admin can also block or activate the users photographs while activating/blocking the user photograph, admin would see a remark popup where he would give the reason (reason is mandatory to mention) to activate/block the photos in max 255 characters, and click on the submit button. A popup of "Status Changed Successfully" will be displayed on the screen.

#### View Popularity of the Bar Hopper:

Admin will be able to track the popularity of the Bar Hopper i.e. which bar hopper has:

- Most No. of Favorite
- Most No. of Gifts
- Most No. of Invites Received
- Most No. of Request to see Profile Information
- Most Popular Bar Hopper in any specific City | State – Users will be able to filter the popular Bar Hopper by state | city

**NOTE:** Bar Hopper will be displayed in descending order. Users will be able to

	<p>filter only by:</p> <p>No. of Favorite</p> <p>No. of Gifts</p> <p>No. of Invite Received</p> <p>No. of Requests Received</p> <p><u><a href="#">View Demographic Report:</a></u></p> <ul style="list-style-type: none"> <li>No. of Favorites for this Week   Month</li> <li>Best Ranking Bar for this Week   Month</li> <li>Most No. of Checked-In for this Week   Month</li> </ul>
Screenshot:	

#### 5.4. Bar/ Bar Owner Management (UC\_MAB\_AD\_04):

Use Case Name:	Bar /Bar Owner Management
Actors:	Administrator
Description:	It will provide the admin to manage the profile for the bar/bar owner also they would be able to verify them through this panel.
Trigger:	When a user clicks on the bar management on the dashboard.
Preconditions:	Admin must be logged in.
Normal Flow:	<p>Bar owner admin should have ability to send marketing emails through superadmin. For example, a bar wants to invite or send special promotions to patrons of the bar. The bar owner should have that option as long as they are a paid member( limit to 1000 patrons per marketing promotion). The bar owner will not have access to email or SMS info of the barhoppers</p> <p>Flexsin: We will be using mail chimp for emails.</p> <p><b>Bar /Bar Owner management would allow admin to:</b></p> <p>Admin user clicks Bar tab at the admin dashboard</p> <p>System will display :</p> <ul style="list-style-type: none"> <li>Add Bars: Admin has the right to send email invites to bars/bars owners to join the meet at bar team. Admin would be entering –  Name (Mandatory): Enter name of the bar.  <u>Bar Name</u> (Mandatory): Enter bar's name.  <u>Email</u> (Mandatory) : Enter email address.  <u>Invite</u>: Click on invite button to send invitation.</li> <li>Manage Bars: Admin can manage and view the entire bar details and</li> </ul>

can remove the data registered by the bar owners about their bars.

Admin would be able to view –

- List of registered bars
- S.no
- Bar Name: Enter the bar name.
- Location: Enter the location.
- Has Owner? : Admin can select Yes/No from the drop down list.
- Checkin count: No. of checkins.
- Status: Admin can select the status (Active/Blocked) from the drop-down window.
- Actions:
- Admin can also block or activate the Bars - While activating/Blocking the bar, admin would see a remark popup where he would give the reason (reason is mandatory to mention) to activate/block the bar in max 255 characters, and click on the submit button. A popup of Status Changed Successfully will be displayed on the screen.

Admin can view the details of the bar :

- Bar Name
- Registered?
- Tagline
- Website
- Description
- Address 1
- Address2
- City
- State
- Country
- Zip code
- Contact Person
- Contact Phone
- Have Specials?
- Have Live Music?
- Have Special Events?
- Have Drink Specials?
- Cuisine
- Capacity
- Bar Logo
- Profile Picture
- Bar Photos: Admin can also block or activate the user photograph while activating/Blocking the user photograph, admin would see a

remark popup where he would give the reason (reason is mandatory to mention) to activate/block the photos in max 255 characters, and click on the submit button. A popup of Status Changed Successfully will be displayed on the screen.

Admin can delete the bar/bar owner details –

Admin would delete the bar/bar owner's details.

A popup with a message "Are you sure you want to delete owners details" will be displayed.

Click on Ok button to delete the details or click on cancel button to undelete the details.

#### View Popularity of the Bar Owner:

Admin will be able to track the popularity of the Bar Owner i.e. which bar has:

- Most No. of Favorite
- Best Rating/Ranking
- Most No. of Checked-In
- Most Popular Bars in any specific City | State – Users will be able to filter the popular Bar by state | city

**NOTE:** Bar listing will be displayed in descending order. Users will be able to filter only by:

No. of Favorite

Ratings/Rankings i.e. 5, 4, 3, 2, 1 (Admin can select any ranking to see the relevant result for Bars under that criteria).

#### View Demographic Report:

- No. of Favorites for this Week | Month
- Best Ranking Bar for this Week | Month
- Most No. of Checked-In for this Week | Month
- Users demographic Report
  - Income Level
  - Gender (Male | Female)
  - Marital Status (Single | Married)
  - Education Level
  - City

**NOTE:** If Bar Owner has allowed super admin to update the information or create Promotions / Events then super admin will be able to update the information/upload photos and create Promotions / Events for particular Bar.

Admin will also be able to do the following things for the Bar Owner profile from the backend:

- Upload photos to bar landing page

	<ul style="list-style-type: none"> <li>• Change the main pic of the bar</li> <li>• Correct information on the bar profile page</li> <li>• Admin will also be able to filter the bars based on their approval status as             <ul style="list-style-type: none"> <li>○ Temporary Approved &gt; until the bar is verified by OTP</li> <li>○ Approved &gt; once it is been verified by OTP</li> </ul> </li> </ul>
Screenshot:	

### 5.5. Event Organizers Management (UC\_MAB\_AD\_05):

#### 5.12. Manage Advertisements (UC\_MAB\_AD\_12):

Use Case Name:	Manage Advertisement
Actors:	Administrator
Trigger:	Admin clicks 'Advertisement with us' button on admin dashboard.
Description:	This section of the website enables admin to manage the advertisement for the users.
Normal Flow:	<p>System shall provide a means to administrator to</p> <ul style="list-style-type: none"> <li>Create the advertisement for users</li> </ul> <p>Admin will also be able to create the advertisements for the third party websites and when a user clicks on the Ad then it will direct to the third party website.</p>

	<p>Admin will be able to view the list of the Ads they have posted.</p> <p><b>NOTE:</b> We will not show any impression or no. of clicks for the Ads. Please confirm.</p> <ul style="list-style-type: none"> <li>• View the advertisements</li> <li>• Manage the pricing for the advertisements plans.</li> <li>• Manage the duration, pages and style of advertisement.</li> <li>• Admin will be able to view the status of the advertisement from the backend.</li> <li>• Admin will be able to delete any in-appropriate ad from the backend.</li> <li>• Admin will be able to view the list of Ads who will expire in certain duration by using the filter.</li> <li>• Admin will be able to view the report for the Ads who have paid.</li> <li>• Admin will also be able to upload the paid advertisement.</li> </ul>
Screenshot:	

### 5.13. Manage Mass Mail (UC\_MAB\_AD\_13):

Use Case Name:	View Reports
Actors:	Administrator
Description:	Super Admin will be able to manage and send mass mail to all the users.
Normal Flow:	<p>Admin will be able to send the Mass Mail to Bar Owners   Bar Hoppers:</p> <p><b><u>Select using Drop down:</u></b> Bar Owner   Bar Hopper   Promoter   Event Organizer</p> <p><b>Include promoters and event organizers</b></p> <p><b>Flexsin: Okay</b></p> <p><b><u>For Bar Hopper, there will other filters as well:</u></b></p> <p>Popularity of the Bar Hopper</p> <p><b>NOTE:</b> As you have mentioned in your comment i.e. Demographic, please let me know whether the Demographic report will be displayed for the Mass Mails or what?</p> <p><b>For example superadmin wants to send emails to only females or</b></p>

	<p>both male and female or to specific demographic, we need to be able to search based on a filter then send a mass email to the chosen filtered users</p> <p>Flexsin: Okay we will consider your point.</p> <ul style="list-style-type: none"> <li>• Email Address (Mandatory)</li> <li>• State (Mandatory): Admin would select the state from the drop down list.</li> <li>• City (Mandatory): Admin would select the city from the drop down list.</li> <li>• Subject (Mandatory): Enter the subject.</li> <li>• Body (Mandatory): Enter the body of the mail, this text can be formatted.</li> <li>• Captcha Code (Mandatory): Admin need to enter the Captcha code which will be displayed below.</li> </ul> <p><b>What is captcha code?</b></p> <p>Flexsin: A CAPTCHA (a backronym for "Completely Automated Public Turing test to tell Computers and Humans Apart") is a type of challenge-response test used in computing to determine whether or not the user is human.</p> <ul style="list-style-type: none"> <li>○ Admin can request for a new code by clicking on Get a New Code.</li> <li>• Submit: Click on submit button to send the mail.</li> </ul> <p><b>Note:</b> After clicking on the submit button notification will be displayed on the page if the admin miss some mandatory field or entered the wrong Captcha code.</p> <p>Demographic report should show the income level, male or female, married, single, education level, what city are they from</p> <p>Flexsin: ok, we will consider the above points in the demographic report. Admin will be able to view the demographic report of the user in the report section which includes the following-</p> <ul style="list-style-type: none"> <li>• Income Level</li> <li>• Gender (Male   Female)</li> <li>• Marital Status (Single   Married)</li> <li>• Education Level</li> <li>• City</li> </ul>
Screenshot:	NA

#### 5.14. Manage Sub-Admin (UC\_MAB\_AD\_14):

Use Case Name:	Sub – Admin
Actors:	Administrator
Description:	It will provide the admin to manage the Sub -Admin
Preconditions:	Admin must be logged in.
Normal Flow:	<ol style="list-style-type: none"> <li>1. Admin will be able to add the sub-admin from the backend.</li> <li>2. Admin will be able to select the modules to give permission to sub-admin to access.</li> <li>3. Admin will be able to edit/delete the sub-admin from the backend.</li> <li>4. Sub-Admin will be able to login into the backend by using the credentials provided by Super-Admin.</li> <li>5. Admin will be able to view the list of sub-admin with permissions.</li> <li>6. Admin will be able to manage the roles for the sub-users to create the Event   Promotion on behalf of Bar.</li> </ol> <p><b>NOTE:</b> We will develop the sub-admin functionality in such a way where admin can give the permission to access any module to sub-admin. There won't be any sub-module permissions i.e. if there is functionality to view/edit/delete then sub-admin will also be able to do the same thing.</p> <p><b><u>Roles for the Sub-Admin:</u></b></p> <ul style="list-style-type: none"> <li>• Upload of photos to Bars</li> <li>• Create a bar profile page for Bars</li> <li>• Create Advertising</li> <li>• Track subscription payment</li> <li>• Status to co-administrators</li> </ul> <p><b>NOTE:</b> We need to discuss the same roles for the sub-admin.</p>
Screenshot:	

#### 5.15. CMS Management (UC\_MAB\_AD\_15):

Use Case Name:	Manage CMS Pages
Actors:	Administrator
Trigger:	Admin clicks "CMS" button on admin dashboard.
Description:	This section of the website enables admin to manage the CMS

	pages of the website.
Preconditions:	Admin user should be on their dashboard
Normal Flow:	<p>System shall provide a means to administrator to add/edit/delete the CMS content in the pages.</p> <ol style="list-style-type: none"> <li>1. System shall provide a means to administrator to search/filter CMS pages.</li> <li>2. This will include these pages: <ul style="list-style-type: none"> <li>• Features</li> <li>• About</li> <li>• Testimonial and Introduction Video (Manage From Backend to change video)</li> <li>• Get App</li> <li>• Privacy policy</li> <li>• Terms and conditions</li> <li>• Help</li> <li>• Contact Us</li> <li>• Social Media Links Management i.e. Facebook   Twitter   Instagram</li> </ul> </li> </ol> <p><b><u>Manage Banners:</u></b></p> <p>Admin will be able to manage the banners of the homepage.</p> <p>Admin will be able to change   delete the banner of the homepage from the backend.</p> <p>Admin will be able to change the text of the banner from the backend.</p> <p><b>NOTE:</b> Text should be limited o.w. design could be hampered.</p> <p><b><u>Manage Features for Bar Hoppers and Bar Owners:</u></b></p> <p>Admin will only be able to change   edit delete the content for the feature for Bar Hopper and Bar Owner.</p> <p><b>NOTE:</b> Title and icon will not be changed from the backend.</p> <p><b><u>Email Template:</u></b></p> <p>Admin will be able to manage the Email Template as well from the backend.</p> <p>We will develop the defined template and admin will be able to edit the template to send it to the users.</p> <p><b><u>Contact Us Management:</u></b></p> <p>Admin will be able to view the queries got from the user using</p>

	<a href="#">Contact us form.</a> Admin will be able to reply to the user from the backend itself.
Post Conditions:	Admin can manage CMS pages or can come back to their dashboard
Comments:	Admin will be able to Add/Edit/Delete content pages <i>Need to discuss with client for the CMS pages</i>

#### 5.16. View Reports (UC\_MAB\_AD\_16):

Use Case Name:	View Reports
Actors:	Administrator
Description:	Super Admin will be view all the reports.
Normal Flow:	<p>We need a list of all members in a table and where it can be searched by city and state. I need to be able to check on specific users and be able to send mass email. The same should be available for the bar owners. Admin should be able to see all ads posted and advertisements and promotions</p> <p>Flexsin: This is already mentioned in the srs.</p> <p>Admin will be able to view :</p> <ul style="list-style-type: none"> <li>• No. of users</li> <li>• The list of payment received.</li> <li>• No. of checkins per day in each bar.</li> <li>• No. of adds posted per day</li> <li>• No. of events, advertisement created per day.</li> <li>• No. of membership plan purchased.</li> <li>• No. of registered Business and users.</li> </ul> <p>Admin will also be able to view the list of the reports submitted by the users for any user:</p> <p>View List of report</p> <p>View User Report</p> <p>View Payments Received by Bar Hopper   Bar Owner</p> <p>View Reason</p> <p>Take Action</p> <p>Delete User   Send Warning</p> <p>NOTE: Warning will be sent to user's email address.</p>

	We will integrate the Google Analytics Tool on the backend. Super Admin will be able to view the Google Analytics section at the backend itself by using the i-frame.
Screenshot:	NA

**5.17. Logout (UC\_MAB\_AD\_17):**

Use Case Name	Logout
Actors:	Logged in Administrator
Description:	This use case will allow the admin to logout the account.  The account will automatically get logout in case of session expired.
Trigger:	"Logout" Call to action
Preconditions:	Administration session is not expired (explicitly or implicitly).
Normal Flow:	On clicking "Logout" System Administrator or admin user will be redirected to the login area ( <a href="http://www.yourdomain.com/admin">www.yourdomain.com/admin</a> ) and all the sessions will be cleared.
Alternative Flows:	-
Post Conditions:	Administrator can attempt to login again.
Screenshot:	NA
Comments:	NA

**5.18. Manage Post for Newsfeed**

Admin will be able to post any photos / videos from the backend for Newsfeed section.

- [Enter Title](#)
- [Enter Description](#)
- [Upload Photo | Video](#)
- [Submit](#)

**View | Manage Post**

Admin will be able to view the post submitted from the backend. Admin will be able to view edit/delete the post from the backend.

- **Post 1**
  - [Post Title](#)
  - [Post Description](#)
  - [View Upload Photo | Video](#)
  - [Action:](#)
    - [Edit | Delete | View Activity](#)

- Post 2 | 3 | 4..so on.

In View Activity, admin will be able to view how many no. of likes | Comments got on the post.

- View No. of Likes
  - View User Profile who has liked the Post
    - User Name
    - User Profile Picture
    - Click to view details
- View No. of Comments
  - View Comments submitted by the User Profile
  - Remove Comment
    - View User Profile who has submitted Comment
    - User Name
    - User Profile Picture
    - Click to view details

Submit Your Comment: Admin will also be able to submit the comments in the post as well.

**NOTE:** There will not be any Comment on comment functionality.

Query: We are assuming by seeing your comment, admin will also be able to create the promotion.

#### AdMob Integration:

We will integrate the Google AdMob API for the Advertisements shows over the bottom or Full Page screen. Once a user clicks on the page then user will direct to the Third Party website.

Admin can see the track and progress of Advertisements on Google Admob account.

NOTE: Ads will not be displayed to Paid Members. Only Free members will see the Ads over the application.

#### **5.19. Manage Gifts**

- Admin will be able to manage the gifts from the backend.
- Admin will be able to add the Gifts i.e. Gift Name, Image, Description (if any) from the backend.
- Admin will be able to view the list of the Gifts added from the backend.
- Admin will be able to view the edit/delete the gifts from the backend.

#### View Reports:

Admin will be able to view the no. of gifts earned by the users i.e. user receives the gifts from the user.

Admin will be able to view which gift is the most used/sent by the user from the backend.

#### **5.20. Manage Reports for Newsfeed | Users | Bars | Events | Promotions**

Admin will be able to view to report submitted by the user for the following actors:

Post on Newsfeed

- Admin will be able to view the report submitted by any user for the post.  
Admin will be able to view the user who has posted the photo/video and view photo/video content.

- Admin will be able to view the reason for the report and have an option to delete the post.

**NOTE:** System will notify the user who has posted the report with a notification that Admin will take the appropriate action to delete the user.

#### **Bar Hoppers**

- Admin will be able to view the user who has report for the Bar hopper with a reason selected.
- Admin will be able to take an appropriate action i.e. Edit info | Delete User.

#### **Bar Information**

- Admin will be able to view the user who has report for the Bar with a reason selected.
- Admin will be able to take an appropriate action i.e. Edit info | Delete Bar Info.

#### **Event | Promotion**

- Admin will be able to view the user who has report for the Event | Promotion with a reason selected.
- Admin will be able to take an appropriate action i.e. Edit info | Delete Event | Promotion.

## 6. ASSUMPTIONS:

- ✓ Any additional features/functionality requested during the project development will be considered as “Request for Change” and charged separately.
- ✓ App content (text, pictures, videos, etc.) will be provided by client.
- ✓ Cost of services from third party vendors will be borne by client and service vendors are needed to be identified in advance before project commencement. Client is responsible for inter-vendor communication.
- ✓ We will integrate the AdMob API for the advertisements.
- ✓ We will integrate the Twilio SMS API for phone verification and Twilio Chat API for Group and Individual Chat.
- ✓ Application will be run online when the phone is connected to Internet or Wi-Fi. If there is not internet then a pop-up or a screen will be displayed to see i.e. No Internet Connection.
- ✓ Regarding the Google Places API, we're doing our analysis by fetching the 1 lac data from Google and trying to find out how the speed will be hampered if we will get the Bars from own database.
- ✓ There will be other type of users:
  - Promoters
  - Event Organizers
  - Advertisers

**NOTE:** The dashboard will have the sub-set features of the Bar Owner. Once we're clear with the scope of the Bar Owners then we will define the features for another type of users.

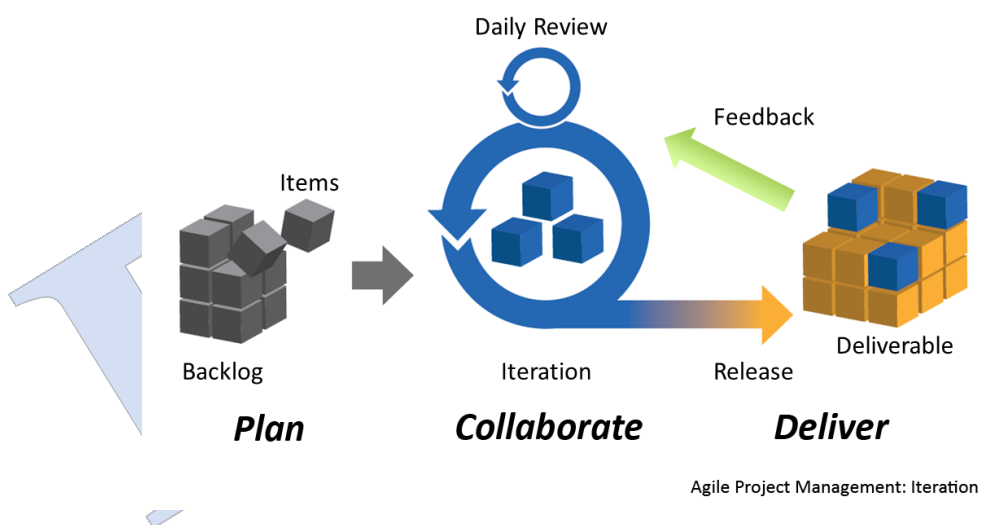

## 7. DEVELOPMENT APPROACHES:

SRS Preparation: Based on Client Requirements, we will provide our client a software requirement specification.

A SRS has written by a Business Analyst to gather the core requirement from the client. A Software requirements specification (SRS), a requirements specification for a software system, is a complete description of the behavior of a system to be developed and may include a set of use cases that describe interactions the users will have with the software. In addition it also contains non-functional requirements. Non-functional requirements impose constraints on the design or implementation (such as performance engineering requirements, quality standards, or design constraints). After confirmation of the SRS, we move on the next phase of the project process there we have assigned a project manager.

There are a number of approaches to managing project activities including lean, iterative, incremental, and phased approaches. Regardless of the methodology employed, careful consideration must be given to the overall project objectives, timeline, and cost, as well as the roles and responsibilities of all participants and [stakeholders](#).

We will divide the development process of application into smaller task and we follow incremental approach in development. However, in your project, we will create the design of the app first for your approval using Iterative approach and make the amendments to freeze the design. We would require to freeze the design first in order to get the right development as per required functionality.

As we don't have any Proof of Concept thus we would require to follow the Agile Methodology with Iterative approach. Please see the below image, you could understand our approach for the project. At the development level, we will use the incremental approach and will submit the development updates to you for review and will work out accordingly.

**a. Reliability and Performance**

- ✓ The system should be stable and should be available 24/7
- ✓ The system must have "commit-and-rollback" features; if one of the variables has failed, then all the other variables need to fall back to their original values.
- ✓ The system shall be used for more than hundreds of thousands of requests. All requests should run simultaneously without affecting the performance of the system.
- ✓ The system should be able to support hundreds of thousands of concurrent members. The performance and number of concurrent members mainly depends on hardware. The application does not have a limitation on number of concurrent members.
- ✓ One should have mobile application knowledge to view these applications.
- ✓ Application should be popular to attract many users
- ✓ One should be affordable for viewing these applications through internet.

**b. Change request**

Based on quality guidelines, the change requests are analyzed for impact with respect to the software design, code, project schedule, efforts and associated commercial terms. A change register will be maintained for tracking.

Any changes in functional specifications as well as any changes to the approved solution design due to variation in the scope will be managed as per change management process, whether or not it results in increased efforts, and hence price.

Sr. No	Client	Flexsin
1	Client send their Additional requirements documents	Technical leads/Project manager will check those requirements.  Technical leads/Project Managers will sends hourly breakdown on the effort for each task based upon the requirements.
2	Client check the efforts of their requirement, If client approves it	SRS will be revised by the business analysis person and will be sent to the client for

3	Client approves the SRS	approval.  Project execution will be continued based upon the revised SRS.
---	-------------------------	--

#### c. TECHNICAL DEPARTMENT TIMINGS

- Working hours : 09:00 AM to 6:30 PM IST or GMT + 5.30 hours
- Working days : Monday to Friday

#### d. CLIENT ENGAGEMENTS MATRIX:

Communication Plan

Sr. No	Item	Responsibility	Frequency	Remarks
1	Skype Chat	Flexsin to create a Skype room by adding the project manager for a direct communication with <b>[Client]</b>	As and when required	To ensure clear and concise communication, and offer high level of transparency
2	Emails	All	As and when required	Project Manager to be copied in all emails to ensure all are on same page
3	Phone/ Go to meeting	Flexsin	Weekly	To provide weekly demos and weekly status updates
4	Response to queries	Client	As and when required	Response to our queries and questions are expected within 2 business days to ensure timely delivery

#### e. Deliverables(During Execution Phase)

Sr. No	Item	Responsibility	Frequency	Remarks
--------	------	----------------	-----------	---------

1	Build for App	Flexsin	Twice a month or a mutually agreeable frequency	We will send you the executable build, for testing and feedback. Feedback is expected in 3 business days.
2	Weekly Sign off document	Client	Twice a month or a mutually agreeable frequency	The last milestone is frozen until payment* is released

S. No.	Escalation type	Responsibility	Time to Resolve
1	Small Issue/Bug/Technical Problem	Technical Lead	24 Working hours
2	Engagement Level or Major Issue	Project Manager	48 Working hours
3	Deal Breaker, Scope Enhancement, Reduction	Business Head/Delivery Head	Working hours

• **Note:**

- Project would be on Hold, if there were no response from client for consecutive fifteen (15) days.
- Project would be terminated, for non-responsiveness from client, for consecutive thirty (30) days and payment received for previous milestones and/or change requests are non-refundable.

**f. TERMS & CONDITIONS:**

- Flexsin Technologies will commence work on the client project on receipt of a signed copy of the services agreement and payment receipt. The same date will be assumed as project commencement date.
- Flexsin staff will be working on the projects in the normal business hours i.e. 9:00 am to 6:30 pm (Indian Standard time).
- Flexsin Technologies will not provide any other workforce to client for this project. In case there is any requirement this would be agreed separately in a written agreement.
- Email communication with Flexsin Technologies would be via the email: info@Flexsin.com or the Instant Messengers IDs mentioned here under:
  - **Skype ID:** Flexsin.sales and Flexsin.bd
  - **Google Talk:** flexsin@gmail.com
- The Client is aware of Flexsin Technologies skill set and the projects assigned leverage these skills only.
- All the services under this agreement will be performed in India.
- If any new/additional skills are required, Client shall communicate the same to Flexsin Technologies and an action will be taken based on mutual consent and a revised agreement in writing.
- Each party agrees not to disclose any Confidential Information to any third parties.
- Client will pay Flexsin Technologies for the services of the Staff as per the mentioned in the agreement.
- No refunds will be made for these deposits; however, unused balances may be applied towards future projects.
- Client to notify of acceptance for each completed deliverable within 7 business days from demo, satisfactory inclusion of client feedback and delivery of executable files to client.
- Upon acceptance within the stipulated time frame, an invoice would be issued for completion of milestone(s). If there is no response within the stipulated time frame (7 days from the date deliverables were submitted) from client on acceptance, is deemed to consider milestones have been accepted by client.
- Upon acceptance of deliverable, client to inform to proceed to the next milestone.
- If client requests revisions to the deliverable, client should outline the necessary changes. Flexsin will resubmit the deliverable to the client within three (3) business days or within a time frame mutually agreed by both parties.
- Any additions to or deletions from the Architectural and Requirement document to this contract and the deliverables listed on this Agreement will be considered a "Change of Project Scope" and would be billed as per the rate card.
- Payment for any Change Request shall be paid immediately after completion. . Any Add-On required after completion of the project shall go through the Change Request process and 100% upfront payment shall be expected for that Add-On.
- Client shall provide Apple Developer account & Google Play Developer Account.

- Client shall provide hosting for backend system; however shall suggest appropriate hosting requirements for the project.
- Client to provide the development license/access of third party tools, proprietary tools and APIs. Client will primarily coordinate with provider of third party tools in case of project team requires any support or clarification.
- Neither party may hire or solicit to hire any employee nor consultant of that provided services to Client within the term of this Statement of Work under this Agreement and for the next subsequent two years (2) to its termination.
- The payment becomes due on the same day as the deposit is depleted and invoice sent to the client.
- If a payment is overdue for 2 or more working days, Flexsin Technologies reserves the right to de-allocate the resources from the project(s) and terminate this agreement till further communication.
- The estimates provided in the proposal are based on the requirements specified in the document. Any change in the requirements or delays in communication will have a direct impact on the cost of the project.
- Flexsin Technologies shall not be held liable to any person who may suffer loss or damage which may arise from their use of any information supplied by Client and contained in Client's website.
- Flexsin Technologies shall not be held liable for accuracy of any information supplied by the client and contained in Client's website.
- The client agrees to the content mentioned in this document for the entire project. Any other discussion that is not mentioned in this document is not a part of the project. Any additional requirement work will be considered as change order as mutually agreed.
- The services provided to the client are on best effort basis and prevailing industry standards. We will do all that is required within our limits to ensure work is carried out in a timely manner.
- All content, images, audio and video for the project to be provided by the client.
- All the images and text would be for placeholder purposes only and shall be replaced upon receipt of the actual content as provided by the client.
- After final delivery Flexsin will not hold any of the details including backups of your project on our development server.

	<b>Final Cost:</b>		<b>\$19,378.00</b>

**Add On Features:****1. Bar hopper Management (UC\_MAB\_AD\_03)**

**CESAR:** Admin needs to be able to send email or SMS to a large number of users filtered by city and state and popularity. Users include bar owner, promoters, event organizers, bar hoppers. Ability for super admin to send a promo code for a free membership or upgrade a user to a paid user.

**FLEXSIN:** Okay, we do note your point. For Promo code, we haven't discussed this so we need to put efforts for the same.

**2. SPY Questions & Feedback (UC\_MAB\_WD\_10)**

**CESAR:** The spy questions should provide incentives for the users otherwise not many will fill it out. For every spy question the user answers they will be able to get a credit for one virtual gift or drink invite credit. Therefore, gifts will not be unlimited in the premier/basic membership. A Premium member can send only 10 gifts per month and a VIP member can give unlimited amount of gifts. A free member will not have any gifts or drink invites to give to other members can give away gifts based on how much they earn on answering spy questions. This means that every user has to be able to track their number of gifts and drink invites available to give to others. ALSO we need to track the popularity of each members based on the area they are in comparing the number of gifts and invites and favorites to other users in the area.

**FLEXSIN:** For incentive of bar hoppers, we haven't discussed this before so we need to put efforts for the same.

**Total Hours From development Team: 40 Hours**

**Total Hours as per our Discussion: 30 Hours**

**Total Cost: \$ 450.00 (30 hr \* 15 \$/hr) – Please Approve**
